### QUESTION 1

You have to import several transport requests into an AS ABAP-based SAP system using transaction STMS (Transport Management System). In the import queue of one of the SAP systems the "Import Request" (Import Single) button is displayed, but the "Import All Requests" (Import All) button is missing. What could be the reason?

- A. The "Import All Requests" button is never available in a development system.
- B. The "Queue-controlled transports, single transports" strategy has been set.
- C. The authorization for "Import All Requests" is missing for the respective SAP system.
- D. Client-specific transport routes have been configured.

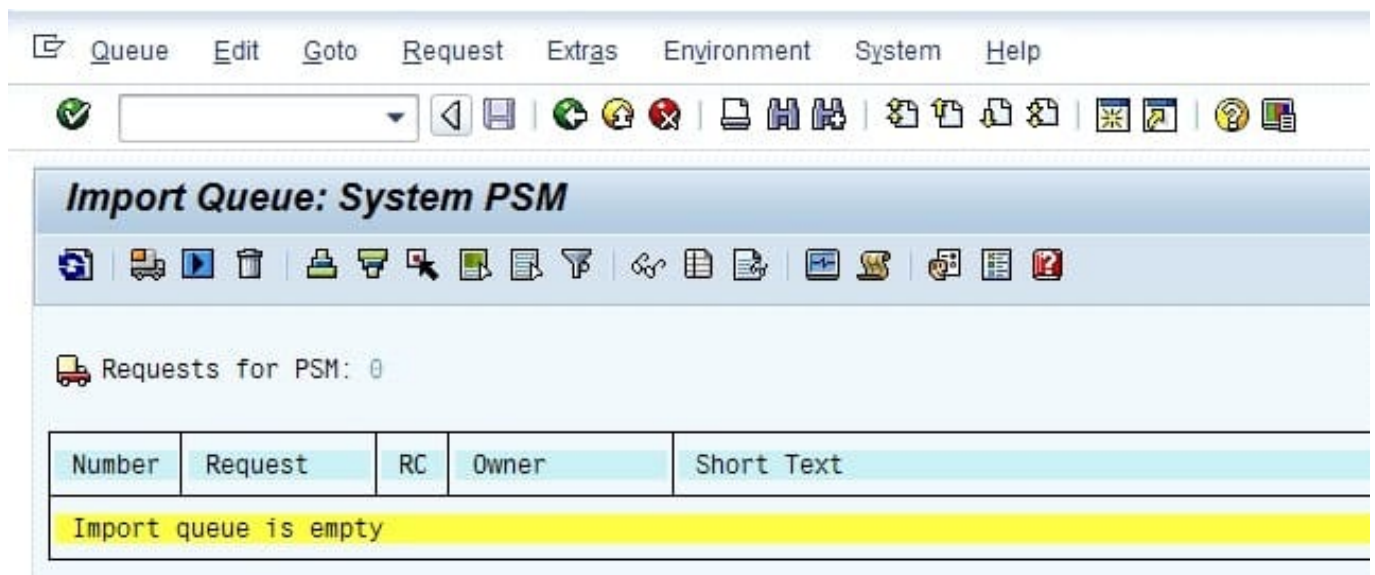

Correct Answer: B

### QUESTION 2

You execute transaction Transport Management System (STMS) and switch to the import queue of an SAP system of the transport domain. Here you find that the Import All Requests button is missing but the Import Request button is available.

Import Request button is available.

What is the most likely reason for this behavior?

- A. The transport strategy for the PSM system is set to Single Transports.
- B. There is no consolidation route pointing to the PSM system.
- C. PSM is a virtual system.
- D. There is no transport request waiting to be imported into this system.
