**QUESTION 1**

You want to improve the data access performance for your SAP database and also to avoid its deterioration in future. Which is the best strategy?

- A. Use as many data files as there are CPUs dedicated to the SQL Server.
- B. Use as many data files as there are CPUs on the database host.
- C. When the database is growing, regularly create new data files for new data to avoid uncontrolled growth of existing files, because data access performance directly depends on the size of the data files.
- D. Keep number of data files of the SAP database and of the tempdb database approximately equal.

Correct Answer: A

QUESTION 2

Which of the following are existing variants of SAP GUI? (Choose three)

- A. SAP GUI for Linux
- B. SAP GUI for Windows
- C. SAP GUI for Java
- D. SAP GUI for HTML

Correct Answer: BCD

QUESTION 3

Which of the following statements concerning the Change and Transport System are correct? (Choose two)

- A. The transport directory is given by the parameter DIR_TRANS.
- B. Small corrections on ABAP programs can be done safely in the production system.
- C. Newly created (and empty) customizing change requests always have one or more tasks.

Correct Answer: AC

QUESTION 4

Which data sources are supported by the User Management Engine (UME) of AS Java? (Choose three)

- A. A file (also called secure store)
- B. A client of an AS ABAP based SAP system

- C. A directory server (LDAP)
- D. A UDDI provider
- E. The database of the AS Java

Correct Answer: BCE

QUESTION 5

Which steps have to be performed before data can be synchronized between an AS ABAP and a directory server?
(Choose three)

- A. Maintenance of host name, port number and product name of the directory server inside the SAP system
- B. Creation of an RFC destination of type "S" pointing to the directory server
- C. Definition of a system user that is used by the SAP system to log on to the directory server
- D. Creation of an RFC connection of type "T" to the LDAP connector
- E. Creation of an SAP user (type "system") that is used by the directory server to connect to the SAP system

Correct Answer: ACD

QUESTION 6

The Integrated Log Viewer is presented as a service of SAP NetWeaver AS Java. It provides runtime control for working with log messages. Which of the following statements about the Integrated Log Viewer is true?

- A. Log Viewer is the right tool for setting and modifying Severity levels.
- B. The Integrated Log Viewer provides options for log and trace configuration. You can add new locations and categories and change the configuration of the existing ones.
- C. The Integrated Log Viewer can merge logs within an SAP NetWeaver AS Java instance.

Correct Answer: C

QUESTION 7

Which of the following statements regarding the Java Message Server are correct? (Choose two)

- A. It is not a critical component of SAP NetWeaver AS system and it can be stopped when not in use.
- B. It can supply information to the SAP Web Dispatcher about the status of AS Java instances.
- C. It keeps a list of all active AS Java instances.

Correct Answer: BC

**QUESTION 8**

Which settings are necessary for activating the integrated ITS?

- A. Set the profile parameter itsp/enable to 1.
- B. Set the profile parameter rdisp/optimize_web_app to 1.
- C. You need to deploy the necessary HTML templates on the operating system level.
- D. Configure the HTML cache of the SAP NetWeaver AS Java.

Correct Answer: A

QUESTION 9

Which of the following statements regarding the client concept and the client copy tools in ABAP- based SAP Systems (for example, SAP ECC) are true? (Choose three)

- A. Application data can only be copied from one client to another, when all client-specific customizing is also copied.
- B. Clients can be copied between SAP Systems of the same release.
- C. Client-independent customizing is always automatically copied between clients.
- D. User master records cannot be copied between clients.
- E. Clients can be copied within a single SAP System.

Correct Answer: ABE

QUESTION 10

Which of the following statements about the gateway process of an SAP system are correct? (Choose three)

- A. The gateway process is able to handle communication between different SAP systems and external programs.
- B. Remote Function Calls (RFC) are handled by the gateway process of the SAP system.
- C. Only the central instance of an SAP system hosts a gateway process.
- D. One gateway process runs in each instance of the SAP system.

Correct Answer: B

QUESTION 11

Using SAPDOCCD.ini, you have several options for changing the way online documentation is accessed. Which of the following statements are true? (Choose three)

- A. You can change the access path to online documentation, depending on the release of the SAP system from which help is being called.
- B. You can change the access path to online documentation, depending on the user ID (in the SAP system) of the user calling help.
- C. You can change the access path to online documentation, depending on the logon language (in the SAP system) of the user calling help.
- D. You can change the access path to online documentation, depending on the SID (System ID) of the SAP system from which help is being called.

Correct Answer: ACD

QUESTION 12

The global system level information is crucial for the Microsoft SQL Server, so that it can start and run. How can this information be restored when it is missing due to a disk crash?

- A. Using a Windows backup, restore the operating system file named master.
- B. Using a Windows backup, restore the files of the database master, and afterwards, restore this database again from an SQL Server backup.
- C. Using a Windows backup, restore the operating system file named system.
- D. Using a Windows backup, restore the files of the database model, and afterwards, restore this database again from an SQL Server backup.
- E. Using a Windows backup, restore the files of the database system, and afterwards, restore this database again from an SQL Server backup.

Correct Answer: B

QUESTION 13

You want to configure the automatic data transfer from an SAP System Landscape Directory (SLD) to the SAP Solution Manager system. Which of the following configuration steps are necessary? (Choose two)

- A. On the SLD system, you need to configure the JCo RFC Provider Service in Visual Administrator.
- B. On the SAP Solution Manager system you need to schedule a periodic data transfer job (Job LANDSCAPE_FETCH). This can be done in transaction SMSY_SETUP.
- C. On the SLD system, you need to trigger an event that starts the data transfer to the SAP Solution Manager system (event START_TRANSFER).
- D. On the SAP Solution Manager system, you need to create a trusted RFC connection of Type "3" to the SLD.

Correct Answer: AB

**QUESTION 14**

Which features are created automatically once you define a transport domain controller in an (ABAP-based) SAP landscape? (Choose four)

- A. The transport profile for the transport control program tp is generated in the file system.
- B. The TMS configuration is stored in the database and the file system.
- C. The transport profile for the transport control program tp is generated in the database.
- D. The user TMSADM is created.
- E. The RFC destinations required for the TMS are generated.

Correct Answer: ABDE

QUESTION 15

You want to install SAP ECC 6.0 as the very first system of your landscape. Which of the following are prerequisites concerning SAP Solution Manager? (Choose three)

- A. SAP Solution Manager must be installed first, otherwise the SAP ECC 6.0 system cannot be installed.
- B. Together with the SAP Solution Manager, a System Landscape Directory (SLD) can be installed.
- C. To install an SAP ECC 6.0 system, a key provided by an SAP Solution Manager is required.
- D. The Solution Manager is part of an SAP ECC 6.0 installation. No additional steps are required.

Correct Answer: ABC
