QUESTION 1

Which tools in the SAP NetWeaver AS 7.00 ABAP and Java Stack are responsible for the registration process in the System Landscape Directory (SLD)? (Choose two)

A. The whole mechanism to register an ABAP based SAP system is event triggered. Once a change in the configuration happens, a background job informs the SLD.

B. The transaction RZ21 allows the configuration of the SLD connection.

C. SAP systems based on AS Java cannot register to the SLD.

D. SAP systems based on AS Java can register to the SLD using the SLD Data Supplier Service in Visual Administrator.

E. The main ABAP transaction to inform the SLD is RZ70. The SAP gateway is involved.

Correct Answer: DE

QUESTION 2

You have installed an AS ABAP+Java system and the default UME configuration was not changed. Which of the following statements are true (for one client of the AS ABAP system)? (Choose two)

A. ABAP authorization profiles appear as UME security roles.

B. The assignment of ABAP users to ABAP groups appears as the assignment of UME users to UME roles.

C. ABAP roles appear as UME groups.

D. The assignment of ABAP users to ABAP roles appears as the assignment of UME users to UME groups.

Correct Answer: CD

QUESTION 3

Which of the following statements regarding the functions offered by CCMS-based monitoring are true? (Choose two)

A. It is possible to monitor more than one SAP system by using the functions offered by CCMS monitoring.

B. Correctly configured threshold values to be used for monitoring purposes can be switched by using operation modes.

C. You need a special key (generated within SAP Solution Manager) to create your own monitor definitions in transaction RZ20.

Correct Answer: AB

QUESTION 4

How many spool work processes can be configured for each SAP instance?

A. More than one spool work process can be configured for each SAP instance.

B. The number of spool processes has to be equal to the number of background processes.

C. Only one spool work process can be configured for each SAP instance.

Correct Answer: A

QUESTION 5

Which statement regarding front end printing with SAP NetWeaver AS ABAP is correct?

A. It is not possible to configure an output device for front end printing with SAP GUI for Java.

B. If you want to configure an output device for front end printing with SAP GUI for Windows, you should choose access method G.

C. If you want to configure an output for front end printing with SAP GUI for HTML, you have to choose access method G.

Correct Answer: B

QUESTION 6

In which of the following scenarios is RFC communication used as the standard communication method in SAP systems? (Choose three)

A. RFC communication is used for transferring monitoring data between SAP systems.

B. RFC communication is used for exchanging information between the ICM process and a web browser.

C. RFC communication is often used for exchanging business data between different SAP systems.

D. RFC communication is used for exchanging user data between AS ABAP-based SAP systems and the LDAP connector.

Correct Answer: ACD

QUESTION 7

When using SAP NetWeaver Administrator (NWA) for configuration of an AS ABAP+Java based system, which statement is correct?

A. In SAP NetWeaver Administrator you can display the Java Virtual Machine (JVM) properties.

B. In SAP NetWeaver Administrator you can maintain profile parameters for the instance profiles.

C. In SAP NetWeaver Administrator you can maintain Logon Groups for the AS ABAP.

Correct Answer: A

QUESTION 8

You want to maintain the SQL Server parameter, lightweight pooling, to speed up the communication with the SQL Server. Which goals can you achieve with this parameter? (Choose two)

A. To determine that the SQL Server uses threads to run user commands.

B. To determine the size of the thread pool that the SQL Server system uses to maintain client connections.

C. To determine the size of the fiber pool that the SQL Server system uses to maintain client connections.

D. To determine the size of the pool of operating system processes that the SQL Server uses to maintain client connections.

E. To determine that the SQL Server uses fibers to run user commands.

Correct Answer: AE

QUESTION 9

Due to parameter maintenance, you need to stop (and later restart) the SQL Server instance. How can you perform this? (Choose three)

A. Stop the service SQL Server (MSSQLSERVER) in Administrative Tools >> Services.

B. Stop the SQL Server instance in the SAP System Management Console (sapmmc).

C. Stop the SQL Server in SQL Server Management Studio.

D. Stop the service SQL Server (MSSQLSERVER) in Administrative Tools >> Services. To perform the stopping (and restarting) as quickly as possible, answer the question whether you also want to stop the service SQL Server Agent (MSSQLSERVER) with \\'No\\'.

E. Stop the service SQL Server (MSSQLSERVER) in the SQL Server Configuration Manager.

Correct Answer: ACE

QUESTION 10

When implementing Central User Administration (CUA), which of the following do you need to consider? (Choose two)

A. CUA can only be set up between two clients.

B. You should define logical systems, using the naming convention CLNT###, where signifies your system ID and ### signifies a client number. You need to create RFC connections using the same naming convention.

C. CUA uses ALE to distribute user master data.

D. You have to decide: either you want to use CUA or you want use a directory server for user management. You

---

cannot use both at the same time for the same client.

E. Authorization profiles generated by role definitions are distributed along with role definitions.

Correct Answer: BC

QUESTION 11

Which of the following is true when creating new clients within an SAP System based on AS ABAP (for example, SAP ECC)?

A. Customizing and repository objects from a source client are automatically copied to the new client using the client copy tool.

B. Remote client copies generate large data files at the operating system level.

C. Log files indicating the success of a new client creation are stored in the home directory of the user initiating the copy.

D. The client transport tool can be used to transfer the same source client, simultaneously, from one SAP System to multiple other SAP systems in a single action.

E. The client copy can be accelerated by using several dialog work processes in parallel.

Correct Answer: E

QUESTION 12

You want to improve the data access performance for your SAP database and also to avoid its deterioration in future. Which is the best strategy?

A. Use as many data files as there are CPUs dedicated to the SQL Server.

B. Use as many data files as there are CPUs on the database host.

C. When the database is growing, regularly create new data files for new data to avoid uncontrolled growth of existing files, because data access performance directly depends on the size of the data files.

D. Keep number of data files of the SAP database and of the tempdb database approximately equal.

Correct Answer: A

QUESTION 13

The attached figure shows the first screen of the SQL Server Performance Analysis transaction (ST04). To tune the SQL Server performance, you need to interpret the information displayed on this screen correctly and possibly change some of the SQL Server settings. Which interpretations are valid and which actions should be taken? (Choose three)

A. \'SQL Memory Setting\' = AUTO (note: not shown in the figure, but possible) allows the SQL Server to allocate memory dynamically.

B. The size of the procedure cache (\\\'Proc. Cache (MB)\\\') is always determined by the SQL Server dynamically, independently of the \\'SQL Memory Setting\\'.

C. \\\'CPUs used by MSS\\\' is determined by the SQL Server configuration parameter affinity I/O mask.

D. \\\'Phys. Memory (MB)\\\' is the amount of physical memory assigned to the SQL Server instance.

E. \\\'SQL Memory Setting\\\' = RANGE allows the SQL Server to allocate memory dynamically.

Correct Answer: ABE

QUESTION 14

If you look at the following screenshot taken from an SAP Management Console (SAP MC), which statement about the status of the SAP system DEV is correct?

A. The dialog instance D01 of SAP system DEV is stopped.

B. The database belonging to SAP system DEV is in status "blue". This means that the SAP system is going to be stopped in a few minutes.

C. Some processes of the SAP system DEV are not running.

Correct Answer: C

QUESTION 15

Which of the following are repository objects in an AS ABAP-based SAP system? (Choose two)

A. Programs

B. Buffer areas

C. Screens (Dynpros)

D. Client-independent customizing settings

Correct Answer: AC
