**QUESTION 1**

Which of the following are true concerning conceptual layers in Data Warehousing? (Choose two)

- A. The Operational Data Store layer consists of the processes that manage data within and across the data warehouse and data marts. It is mainly used for backup and recovery, and reloading data.
- B. The Persistent Staging Area layer is the central point of data integration in the Data Warehouse. It delivers a common and historic view of enterprise data.
- C. The Data Warehouse layer is a subject-oriented, integrated and non-volatile collection of data. It is the source of data for the data marts, delivering a common view of enterprise data.
- D. The Data Mart layer is customized and/or summarized data derived from the data warehouse and tailored to support the specific analytical requirements of a business unit or function.

Correct Answer: AC

QUESTION 2

The star schema in SAP NetWeaver BI is an enhancement upon the classic star schema due to the following... (Choose two)

- A. ... aggregated key figures are stored in fact tables.
- B. ... master data is stored outside the star schema.
- C. ... external hierarchies are used.
- D. ... the usage of dimensions.

Correct Answer: BC

QUESTION 3

The following statements apply to a VirtualProvider: (Choose two)

- A. An extraction is started in the source system every time a query is called up that uses a VirtualProvider that is based on a Data Transfer Process.
- B. All DataSources can be accessed / used by a VirtualProvider.
- C. VirtualProviders are used in mass data extraction.
- D. VirtualProviders can be used as persistent data stores.
- E. VirtualProviders can be used in a MultiProvider.

Correct Answer: AE

QUESTION 4

A Section in the Report Designer is assigned to a:

- A. Web Item
- B. InfoProvider
- C. Data Provider

Correct Answer: C

QUESTION 5

Which of the following tasks can be performed in or can be called from the Data Warehousing Workbench? (Choose three) A. Creation of DataStore Objects

- B. Creation of Variables (central wizard)
- C. Process Chain Maintenance
- D. Creation of SAP Transports for BI Objects
- E. Design of BI Web Applications

Correct Answer: ACD

QUESTION 6

The Remodeling Toolbox allows you to define:

- A. Several subsequent remodeling steps for your most important BI Objects like Queries, InfoProviders and Process Chains.
- B. A single remodeling step for InfoCubes or DataStore Objects. Before executing the remodeling process the corresponding InfoProviders have to be emptied.
- C. Several remodeling steps for an InfoCube without the need to empty this InfoCube. Remodeling steps can, for example, include adding key figures, or replacing characteristics.
- D. A remodeling rule for a process chain, including an integrated batch process consumption check and rescheduling.

Correct Answer: C

QUESTION 7

Which of the following statements is true of the star schema of InfoCubes in SAP NetWeaver BI? (Choose three)

- A. Characteristic values are stored hierarchically in dimension tables.

- B. Master data information is stored outside the dimension tables.
- C. The SID table represents the connection between the master data and dimension tables.
- D. SID technology simplifies the sharing of master data.
- E. Characteristic InfoObject master data must always be stored in dimension tables.

Correct Answer: BCD

QUESTION 8

Which of these statements about BI Content are correct? (Choose three)

- A. Industry-specific BI Content is developed.
- B. BI Content speeds up BI implementation.
- C. BI Content includes DataSources in SAP source systems.
- D. Before activating BI Content for SAP source systems, BI Content DataSources have to be activated manually in transaction SBIW in the SAP source system.

Correct Answer: ABC

QUESTION 9

Which of the following statements about navigation attributes is correct?

- A. You can add navigation attributes to the data model of an InfoCube, without having to reload the data that is already contained there.
- B. The read mode of the query can be used to compensate for the loss in performance which arises from the additional read step in the selection using time-dependent navigation attributes.
- C. The time-dependent navigation attribute Material Group for characteristic Material can only be activated as a navigation attribute in an InfoCube if Material Group is also assigned to a dimension of the InfoCube.

Correct Answer: A

QUESTION 10

Which definition best describes a "Bookmark"?

- A. A URL which links to a predefined navigation state of a BI Web Application.
- B. A Microsoft Excel VBA link to a predefined navigation state of a BEx Analyzer report.

- C. A pointer used to highlight data by color codes on a BI Web Application.
- D. A pointer used to highlight data by color codes on a BEx Analyzer report.

Correct Answer: A

QUESTION 11

DataSources in SAP NetWeaver 7.0 BI: (Choose three)

- A. Can include a PSA table. The PSA table is the persistent inbound layer for all data that is transferred from the source system to SAP NetWeaver BI for a given DataSource.
- B. Can support preview features allowing you to test the data transfer from the source system without the need for transformations.
- C. Define the frequency of data transfer and filters to be applied in the transfer of data from source systems to SAP NetWeaver BI.
- D. Must be connected to InfoSources (using transformations). These InfoSources are then connected to InfoProviders (using transformations).
- E. Define the Delta Process, the Direct Access and the Real-Time Data Acquisition (RDA) capabilities for the transfer of business specific data from a source system to SAP NetWeaver BI.

Correct Answer: ABE

QUESTION 12

Characteristic value variables...

- A. ...are created in the query definition and are therefore only available in that query definition.
- B. ...are created for a characteristic in the query definition and are available for all query definitions of the same InfoProvider.
- C. ...are created for a characteristic in the query definition and are available for all query definitions of InfoProviders containing this characteristic.
- D. ...can be created for global use on an InfoProvider level, and can be created for local use in the query definition.

Correct Answer: C
