### QUESTION 1

What's a functional test?

- A. It tests against the product specifications.
- B. It tests the functionality of the project as a whole.
- C. It tests components coming together
- D. It tests a small piece of functionality, usually at the class method level.

Correct Answer: B

---

### QUESTION 2

Which of the following practices are recommended for a Declarative Pipeline? Choose 3 answers

- A. Use the pipeline DSL to implement intricate networking and computational tasks that your Pipeline needs to do.
- B. Simplify the test/debug process and improve performance of your pipeline by defining separate steps for each Important task performed by the pipeline.
- C. Encapsulate common Jenkins logic within shared libraries when leveraging Declarative Pipelines.
- D. Call scripts written In Shell, Batch, Groovy, or Python to implement any complex logic required for your pipeline; call these scripts as steps in your pipeline.
- E. Use tool such as Maven, Gradle, NPM, Ant, and Make to define most of the build work; cad these executables as steps In your pipeline.

Correct Answer: BCE

---

### QUESTION 3

Which is NOT a continuous integration best practice?

- A. Maintain a single source repository.
- B. Do everything manually with great care.
- C. Build every commit.
- D. Make the build self-testing.

Correct Answer: A

Automation is a central tenant of continuous integration. Any manual process should be automated to the extent possible.

#### QUESTION 4

You have a series of tasks which require execution across different software components to prove the compatibility and functionality of your build and the components as a whole. Which of the following describes the type of testing you will perform?

- A. Acceptance testing
- B. Smoke testing
- C. Unit testing
- D. Integration testing

Correct Answer: D

Testing the integrated functions of multiple components is integration testing

---

#### QUESTION 5

Which of the following are true about the structure of a Declarative Pipeline? Choose 2 answers A. Any Pipeline DSL code that Implements complex computational tasks must be located outside any stage block.

- B. Steps are the logical segmentation of a Pipeline; they contain stages that define actual tasks.
- C. Stages are the logical segmentation of a Pipeline; they contain steps that define actual tasks.
- D. Each pipeline must have a global agent specification.
- E. All stages in a Pipeline must execute on the same type of agent.

Correct Answer: CD

---

#### QUESTION 6

What's a big priority of continuous integration?

- A. Automate only when necessary
- B. Making sure a manager approves every line of code
- C. Fixing broken builds Making sure everyone gets to contribute the exact same amount

Correct Answer: C

When a build breaks, fixing it should be the priority of everyone on the project

---

### QUESTION 7

How can you assign projects to specific agent nodes?

- A. None of these
- B. Using an expression that matches a node's name or label
- C. Select the node from the "Project Configuration" view
- D. Set the projects in the "Manage Node" view

Correct Answer: B

You can configure a project to run on a node, or subset of nodes, based on expression matching of a node's labels.

---

### QUESTION 8

In a "standalone" configuration, when masters manage the build environment and also execute builds with their own resources, which of the following is true?

- A. Build times decrease.
- B. User interface becomes slower as resources on the master run out.
- C. The builds share SCM checkouts
- D. Masters are more highly available.

Correct Answer: B

---

### QUESTION 9

How do you configure notifications in a Jenkinsfile?

- A. emailx
- B. notice
- C. email
- D. alert

Correct Answer: A

---

### QUESTION 10

Which answer best describes continuous integration?

- A. A software development discipline where software is built so that it can be released to production at any time.
- B. A software development discipline where software is released continuously as part of an automated pipeline.
- C. Building in 60 minutes or less.
- D. A software development practice where contributors are integrating their work very frequently.

Correct Answer: D

Continuous integration doesn't mean that software can or will be released or pushed to production continuously.

---

### QUESTION 11

Where does the Jenkinsfile live?

- A. /var/lib/jenkins
- B. /etc/jenkins
- C. With your source code
- D. None of these

Correct Answer: C

The Jenkinsfile typically lives in the root of your project SCM repository.

---

### QUESTION 12

Which is not a function provided by the Jenkins CLI?

- A. db-dump
- B. restart
- C. who-am-i
- D. shutdown

Correct Answer: A

The others are all common functions of the CLI

---

### QUESTION 13

What types of notification integrations are there?

- A. Email
- B. All of these
- C. Slack
- D. HipChat

Correct Answer: B

All of these notification integrations are available.

---

#### QUESTION 14

What's the SDLC?

- A. Sloan Digital Legal Conference
- B. Super Digital Life Chain
- C. None of these
- D. Software Development Life Cycle

Correct Answer: D

The SDLC is contained in CI/CD concepts.

---

#### QUESTION 15

Which are true when installing new plugins? Choose 2 answers

- A. If you check the "Enable rollbacks when upgrading" box, future updates to the plugin can easily be rolled back when necessary.
- B. The previous public release of a plugin is installed for reliability instead of installing the most recent public release.
- C. Most plugins can be installed without stopping and starting Jenkins.
- D. You must install all required and optional dependencies before installing the plugin with the plugin manager.
- E. If you are running Jenkins under an HTTP proxy, you must configure HTTP proxy access for the plugin manager before installing or updating plugins.

Correct Answer: AC
