QUESTION 1

A company would like to move an application to the cloud which resides on a single physical server in their datacenter. The server has two drives, one of which hosts the operating system, and the other hosts the application data. The operating system has been showing errors recently and the application data was corrupted last Friday at 4:00PM. Data is backed up every day at 1:00AM. Which of the following would be the BEST option for migrating this application to the cloud?

A. Setup a server in the cloud, install an operating system, install the application, and copy the data to the cloud server from last Friday\\'s backup

B. Setup a server in the cloud, install an operating system, install and configure the application, and copy the data to the cloud server from last Thursday\\'s backup

C. Clone or P2V the server with both drives to the cloud platform

D. Clone or P2V the server with the application drive to the cloud platform and copy the operating system to the cloud server

Correct Answer: A
