QUESTION 1

In which Data Manager object does a developer specify the attributes of a conformed dimension, such as the surrogate keys that it contains?

A. Reference dimension

B. Connection

C. Transformation model

D. Template

Correct Answer: D

QUESTION 2

A developer has created a fact build with two fact deliveries. What should be done to include only some of the elements of the transformation model in one of the deliveries, and some in the other delivery?

A. Modify the properties of each fact delivery to exclude the relevant elements.

B. Create an output filter to exclude the relevant elements from each delivery.

C. Modify the SQL to exclude the relevant elements from each delivery.

D. Create a level filter to exclude the relevant elements from each delivery.

Correct Answer: A

QUESTION 3

A developer wants to deliver fact data to a relational table. When the fact build is executed, any new rows must be added to this table. However, if an incoming row has the same key as a row that already exists in this table, the existing row must be updated accordingly. What should the developer do?

A. Set the refresh type for the relational table delivery module to UPDATE.

B. Set the refresh type for the relational table delivery module to TRUNCATE.

C. Set the refresh type for the relational table delivery module to UPDATE/INSERT.

D. Set the refresh type for the relational table delivery module to REPLACE.

E. Set the refresh type for the relational table delivery module to APPEND.

F. Set the refresh type for the relational table delivery module to INSERT.

Correct Answer: C

QUESTION 4

A lookup has been created to enable translation of incoming currency values (such as the US dollar) into another currency (such as the Euro). What should be done?

A. Reference the lookup in the properties of the affected dimension build(s).

B. Create a measure dimension which references the conversion rate.

C. Create a derivation which uses the reference atttributes of the lookup.

D. Move the lookup to a fact build conversion map.

Correct Answer: C

QUESTION 5

In the Dimension Build wizard, the developer has specified the schema type as "Star schema." What will be the result of this selection?

A. The dimension will be represented in a single table. Each level of the delivered hierarchy will be represented by one or more columns of this table.

B. The dimension will be represented in a table that contains only the keys of all the levels of the delivered hierarchy. The descriptions of the higher levels will reside in other tables.

C. The dimension will be represented by one table for each hierarchy level. Each table will have a foreign key to the level above.

D. The dimension will be represented in a single table. Each row of this table will contain the ID of the member, together with the ID of its parent.

Correct Answer: A

QUESTION 6

A developer has geographical data from a data source where cities roll up into states, and states roll up into regions. What should the developer create in order to allow Data Manager to aggregate fact data to the region level?

A. Derived dimension

B. Lookup

C. Derivation

D. Hierarchy

E. Dimension

Correct Answer: D

QUESTION 7

A JobStream has been created that, when executed, will write status messages to the log file that indicate whether nodes have completed or failed to run. What type of node should be added to the JobStream?

A. Alert

B. Condition

C. Procedure

D. Email

Correct Answer: C

QUESTION 8

A developer has created a hierarchy that uses multiple data sources. The developer wants to know if there are multiple parents or children without parents. What tool should the administrator use?

A. Navigator

B. SQLTXT Designer

C. SQLTerm

D. Reference Explorer

E. Hierachy wizard

Correct Answer: D

QUESTION 9

A developer has created a fact build where separate summary tables will be created for monthly and quarterly data. What should be created on these fact deliveries to prevent monthly data from being delivered to the quarterly summary table?

A. User-defined functions

B. Derivations

C. Level filters

D. Output filters

Correct Answer: C

QUESTION 10

What can be done to minimize memory consumption?

A. Disable dimension breaking on the fact build.

B. Disable fact build logging.

C. Enable dimension breaking on the fact build.

D. Enable auditing on the fact build.

Correct Answer: C

QUESTION 11

A developer has created a lookup using a template (not a data source) for data access. Why would the developer do this?

A. Data must be accessed from more than one table.

B. The lookup attribute names are different from the source column names.

C. The build will perform automatic surrogate key substitution.

D. A derivation has been added to the lookup.

Correct Answer: C

QUESTION 12

End users must be able to create Cognos 8 reports using data from the data warehouse. To facilitate this, what can the developer do from within Data Manager?

A. Run the Create Framework Manager Model wizard to create a project.

B. Create a Cognos 8 package in the Library area of the catalog.

C. Export the Data Manager metadata to XML for use in Framework Manager.

D. Publish a Cognos 8 package in the Metadata area of the catalog.

Correct Answer: C
