**QUESTION 1**

Backup administrators have noticed slow backups on the AIX environment.

To fix the issue, what should the set large_send be for each NIC, and what should the NFS option be set to?

- A. no and nfs_rfc1323=0
- B. yes and nfs_rfc1323=0
- C. no and nfs_rfc1323=1
- D. yes and nfs_rfc1323=1

Correct Answer: D

larger RPC sizes, you should set the nfs_rfc1323 option Reference: <https://www.ibm.com/docs/en/aix/7.2?topic=tuning-tcpip-guidelines-nfs-performance>

QUESTION 2

Where is the DD System Manager can the status of chassis components be found?

- A. Maintenance > Chassis
- B. Hardware > Chassis
- C. Health > Chassis
- D. Home > Chassis

Correct Answer: B

Reference: https://www.juniper.net/documentation/en_US/release-independent/junos/topics/task/verification/router-chassis-status-nog.html

QUESTION 3

A PowerProtect DD appliance has been installed at a company's location for several months and has reached a steady state. As a best practice, at what percentage of disk utilization should action be taken?

- A. 60%
- B. 70%
- C. 80%
- D. 95%

Correct Answer: C

QUESTION 4

What is the maximum capacity for a DDVE?

- A. 64 TB
- B. 96 TB
- C. 128 TB
- D. 256 TB

Correct Answer: D

Explanation:

DDVE supports 5TB - 256TB per instance

Reference: <https://aws.amazon.com/marketplace/pp/prodview-2x2p43yvgswtm#:~:text=Achieve%20increased%20transactional%20and%20operational,expand%20capacity%20in%201TB%20increments>.

QUESTION 5

What is the maximum capacity that a cloud unit can have with DD9900?

- A. 64 TB
- B. 576 TB
- C. 1,536 TB
- D. 2,016 TB

Correct Answer: B

Reference: <https://nsrd.info/blog/2019/09/26/powerprotect-dd-unleash-the-beast/>

QUESTION 6

What are some key benefits of performing backups and recoveries with a PowerProtect DD appliance?

- A. Increase in the overall size and scope Elimination of physical tape Fewer copies that need to be tracked Increased speed of disaster recovery
- B. Reduction in the overall size and scope Elimination of physical tape Number of copies that do not need to be tracked Increased speed of disaster recovery
- C. Reduction in the overall size and scope Elimination of physical tape Fewer copies that need to be tracked Increased speed of disaster recovery

D. Increase in the overall size and scope Elimination of physical tape Number of copies that do not need to be tracked
Increased speed of disaster recovery

Correct Answer: A

QUESTION 7

A backup administrator wants to verify that quotas have been enabled on a PowerProtect DD appliance. Which command is used to verify that quotas are being enforced?

- A. mtree show quota
- B. quota capacity status
- C. quota capacity reset
- D. quota capacity se

Correct Answer: D

Reference: <https://www.dell.com/support/kbdoc/en-pk/000055400/data-domain-evt-quota-00001-mtree-quota-soft-limit-reached>

QUESTION 8

Which PowerProtect DD procedure uses the DoD/NIST standards to provide data security?

- A. Data Sanitization
- B. Encryption
- C. End-to-End Verification
- D. Replication Encryption

Correct Answer: A

Reference: <https://www.delltechnologies.com/asset/en-us/products/data-protection/technical-support/docu85190.pdf>

QUESTION 9

An administrator has retained snapshots for a single MTree and is trying to create a new one. An error message is received. What is the reason for the failure?

- A. The maximum number of snapshots has been exceeded
- B. The DDOS needs to be upgraded
- C. The user does not have the permission to retain more snapshots

D. There are not enough snapshot licenses

Correct Answer: A

Explanation: The maximum number of snapshots allowed per MTree is 750. Warnings are sent when the number of snapshots per MTree reaches 90% of the maximum allowed number (from 675 to 749 snapshots), and an alert is generated

when the maximum number is reached. To clear the warning, expire snapshots and then run the file system cleaning operation.

Note: To identify an MTree that is nearing the maximum number of snapshots, check the Snapshots panel of the MTree page regarding viewing MTree snapshot information.
