**QUESTION 1**

Which two actions will contribute to an improvement of code security?

Choose 2 answers

- A. Hire a company specialized in secure code review the current code.
- B. Implement a pull request and secure code review.
- C. Integrate a static code security analysis tool in the CI/CD process.
- D. Use two developers to review and fix current code vulnerabilities.

Correct Answer: BC

QUESTION 2

Universal Containers (UC) is hiring offshore agile development teams to decrease costs and enhance UC's capability of delivering new features to its customers. However, the CTO is not able to follow or measure the work of those teams.

What should an architect recommend to increase transparency?

- A. Schedule a daily stand-up meeting with representatives of all offshore teams to share the progress of the teams.
- B. Request the offshore teams to send daily emails to the CTO with the progress of the teams.
- C. Ask the offshore teams to add their progress and status in a shared spreadsheet.
- D. A Request the offshore teams to share their work in progress in a virtual Kanban board tool.

Correct Answer: D

QUESTION 3

Universal Containers is delivering many changes to its Salesforce system. Adoption reports are discovering that many features are unused. The steering committee wants this to change and is looking to the architect for advice.

What should an architect recommend to overcome this?

- A. Using Lightning Web Components for every user interface.
- B. Adopting user centered design to understand user needs before building the solution.
- C. Stop development until current features start being used.
- D. Sending weekly communication emails reporting on least engaged users

Correct Answer: B

**QUESTION 4**

Universal Containers requires its developers to develop and test code in one sandbox per developer before deploying to a common sandbox for code review. Which deployment strategy should be used in this environment?

- A. Refresh the developer's sandbox, develop changes, refresh the common sandbox, deploy to the common sandbox, test changes
- B. Refresh the developer's sandbox, develop changes, test changes, refresh the developer's sandbox, deploy to the common sandbox
- C. Refresh the developer's sandbox, develop changes, refresh the developer's sandbox, deploy to the common sandbox, test changes
- D. Refresh the common sandbox, develop changes, refresh the developer sandbox, deploy to the common sandbox, test changes

Correct Answer: A

QUESTION 5

Universal Containers (UC) innovative apps division is releasing an application which can be installed in their trading partners Salesforce environment. The partners can then build on top of the application with process builders and triggers so the container booking process can be integrated with the trading partners own processes. What is the recommended mechanism for releasing the application?

- A. Zip file deployable by Force.Com Migration Tool.
- B. Unmanaged Package.
- C. Change Sets.
- D. Managed Package.

Correct Answer: D

QUESTION 6

Universal Containers (UC) has a recruiting application using Metadata API version 35, and deployed it in production last year. The current Salesforce platform is running on API version 36. A new field has been introduced on the object Apex page in API version 36. A UC developer has developed a new Apex page that contains the new field and is trying to deploy the page using the previous deployment script that uses API version 35.

What will happen during the deployment?

- A. The deployment script will pass because the new field is backward compatible with the previous API version 35.
- B. The deployment script will fail because the new field is not known for the previous API version 35.
- C. The deployment script will pass because the new field is supported on the current platform version.

D. The deployment script will fail because the platform doesn't support the previous API version 35.

Correct Answer: B

QUESTION 7

Universal Containers (UC) is implementing Service Cloud for their contact centers for 3000 users. They have ~10 million customers. The average speed response time expected is less than 5 seconds with 1,500 concurrent users. What type of testing will help UC measure the page response time?

- A. Unit Testing.
- B. Load testing.
- C. System Integration Testing.
- D. Stress Testing.

Correct Answer: B

QUESTION 8

Universal Containers (UC) development team is using an Agile tool to track the status of build items, but only in terms of stages. UC is not able to track any effort estimates, log any hours worked, or keep track of remaining effort. For what reasons should UC consider using the agile tool for effort tracking?

- A. Allows the organization to track the Developers work hours for salary compensation purposes.
- B. Allows the management team to make critical timeline commitments based solely on developer estimates.
- C. Allows the Developer to compare their effort, estimates and actuals to better adjust their future estimates.
- D. Allows the management team to manage the performance of bad developers who are slacking off.

Correct Answer: C

QUESTION 9

Universal Containers has just initiated a project involving a large distributed development and testing team. The development team members need access to a tool to manage requirements and the testing team needs access to a tool to manage defects. Additionally, stakeholders are requesting ad-hoc status reports. What tool should an Architect recommend to support the project?

- A. Spreadsheets
- B. Code Repository
- C. Wave

D. Port management tool

Correct Answer: D

QUESTION 10

Universal Containers (UC) just started configuration and customization of its Salesforce organization. The architect suggested the definition of an application lifecycle management (ALM) process.

What are three benefits of following an ALM process?

Choose 3 answers

- A. Avoiding defects from being deployed to production.
- B. Training new users after each minor and major release.
- C. Defining metrics for application development project success.
- D. Releasing new features on a consistent schedule.
- E. Preventing existing working functionality from stopping

Correct Answer: BCE

QUESTION 11

Universal Containers (UC) innovative apps division is releasing an application that can be installed in its trading partners Salesforce environments. The application lets the trading partners book containers from UC directly without leaving their

own Salesforce environment.

The partners can then build on top of the application with process builders and triggers so the container booking process can be integrated with the trading partners' own processes.

What is the recommended mechanism for releasing the application considering the innovative apps division wants to keep the application up to date in various environments?

- A. Change sets
- B. Unmanaged package
- C. Managed package
- D. Zip file deployable by SFDX or ANT

Correct Answer: B

QUESTION 12

Which are two characteristics of an effective communication plan? Choose 2 answers

- A. Requesting feedback for outstanding architectural questions
- B. Consistent communication to a pre -defined list of stakeholders
- C. Reporting project status, timelines, and impacts
- D. Communication to stakeholders on a "need -to -know" basis

Correct Answer: BC

QUESTION 13

The opportunity Service and opportunity Service Test classes are in package A but are used only in package B. Both second-generation packages have the same namespace. Therefore, they should be moved to package B for better organization and control.

What should the architect recommend for this process?

- A. Set the classes as deprecated in package A and recreate them in package B.
- B. Move the classes of package A to package B and change the code for package B that called this class from package A.
- C. Move the classes of package A to package B and create new package versions.
- D. Set the classes as deprecated in package A and recreate them in package B with new names.

Correct Answer: B

QUESTION 14

Universal Containers is looking to construct a continuous integration process to help manage code quality. Which three tools should be used to enable this? Choose 3 answers

- A. Force.com Migration Tool
- B. Full Sandbox Environment
- C. Source Control Tool
- D. Project Management Tool
- E. Continuous Integration Build Tool

Correct Answer: ACE

QUESTION 15

Universal Containers (UC) has used Salesforce for the last 6 years with 50% custom code. UC has recently implemented continuous integration. UC wants to improve old test classes whenever new functionality invalidates tests. UC also wants to reduce the deployment time required. What should Architect recommend?

- A. A Do not execute any test classes in sandboxes and Production.
- B. Do not execute test classes in sandboxes and all test classes in Production.
- C. Test classes cannot be executed in sandboxes.
- D. Execute all test classes in sandboxes and selected test classes in Production.

Correct Answer: D
