-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

A business has a recovery point objective (RPO) of nine hours. What does this RPO mean in the event of a disaster?

- A. No more than nine hours of production data can be lost
- B. Restore from backup must occur within nine hours
- C. Production must be resumed within nine hours
- D. A backup copy of the production data must be obtained within nine hours

Correct Answer: A

---

**QUESTION 2**

A customer has a hybrid infrastructure composed of several UNIX and Windows servers. They are looking for a storage system that all servers can share, but will keep hardware changes to a minimum.

What is your recommendation?

- A. NAS
- B. SAN
- C. DAS
- D. CAS

Correct Answer: A

---

**QUESTION 3**

A backup environment has 20 GB of data with 10 percent initial commonality. The data is backed up to a target-based deduplication system on a full, every day backup schedule. After the first backup, 5 GB of data is changed. The same data set is backed up every day.

How much data is sent over the network on the first and second backups?

- A. 20 GB for the first backup; 20 GB for the second backup
- B. 20 GB for the first backup; 5 GB for the second backup
- C. 18 GB for the first backup; 4.5 GB for the second backup
- D. 18 GB for the first backup; 18 GB for the second backup

Correct Answer: A

---

**QUESTION 4**

You need to copy Oracle data from a development server running Windows to a test server running Linux. How is this done?

- A. Oracle online backup
- B. Oracle offline backup
- C. Linux dd command
- D. Database export

Correct Answer: D

---

**QUESTION 5**

A customer is not meeting their current SLA on backups because of a bottleneck on their LAN and cannot expand the bandwidth on their LAN to relieve this bottleneck. How does Avamar help the customer solve this problem?

- A. By transferring only unique subfile data objects
- B. By caching the file data at the client
- C. By prefetching the file data at the client
- D. By transferring all subfile data objects

Correct Answer: A

---

**QUESTION 6**

What is the main objective of testing a recovery plan?

- A. Validate RTO
- B. Validate RPO
- C. Monitor disk usage
- D. Report backup time

Correct Answer: A

---

**QUESTION 7**

What is the process of moving data from one storage medium to another?

- A. Cloning
- B. Replication

C. Staging

D. Twinning

Correct Answer: C

---

#### QUESTION 8

Which Microsoft Exchange Server 2007 backup level deletes log files older than the checkpoint when the backup is complete?

A. Full

B. Copy

C. Synthetic

D. Differential

Correct Answer: A

---

#### QUESTION 9

A customer has experienced a disaster occurring over several days. During that time, several components of critical applications remained operational while other components failed. What will have the most impact to backup and recovery operations?

A. Data consistency

B. Backup retention

C. RTO

D. RPO

Correct Answer: A

---

#### QUESTION 10

What is the maximum fault tolerance of RAID 6, where n is the number of disks?

A. n-2

B. 1

C. n-1

D. 2

Correct Answer: D

---

#### QUESTION 11

Which product automatically creates and stores server configuration information in profiles?

- A. HomeBase
- B. Workbench
- C. Data Protection Advisor
- D. NetWorker

Correct Answer: A

---

#### QUESTION 12

Which deduplication technology stores data to disk before performing deduplication?

- A. Post Process
- B. Client
- C. Inline
- D. Source

Correct Answer: A

---

#### QUESTION 13

How can you ensure that backup data stored in tapes offsite can be read only by authorized parties?

- A. Compress the data using the LZO algorithm
- B. Encrypt the data using a secure encryption key
- C. Set permissions on the save sets on the volumes
- D. Transfer data over a secure, internal WAN

Correct Answer: B

---

#### QUESTION 14

In a backup environment, what is the function of the client software component?

- A. Coordinates the backup
- B. Initiates recoveries

- C. Stores tracking information
- D. Writes data to a backup device

Correct Answer: D

---

#### QUESTION 15

In a backup and recovery environment, what is a benefit of sending multiple streams of backup data to physical tape?

- A. Improved recovery point objective
- B. Reduced recovery time objective
- C. Improved write performance
- D. Improved read performance

Correct Answer: C
