**QUESTION 1**

What can be determined when auditing is enabled on an EMC Isilon cluster?

- A. Who made the change When the change was made If the change can be undone
- B. When the change was made If the change can be undone If proper ITIL process was followed
- C. Who observed the change When the change was made If the change can be undone
- D. When the change was planned If the change can be undone If proper change control was followed

Correct Answer: A

---

**QUESTION 2**

In OneFS, what are valid identifiers when comparing an access token to file authorization data?

- A. SID, UID, and GID
- B. SID only
- C. UID and GID only
- D. File owner and SID only

Correct Answer: A

---

**QUESTION 3**

Before deploying a new EMC Isilon cluster you decide to confirm the details of the installation with the customer. The customer would like to make a change to the subnet pools in the configuration guide.

What should you do first?

- A. Contact the design team
- B. Update the configuration guide
- C. Contact EMC change control
- D. Collect system configuration

Correct Answer: A

---

**QUESTION 4**

An implementation engineer has just joined an EMC Isilon cluster to an Active Directory (AD). The System zone of the cluster is set to default settings.

Which AD group is automatically added to the Isilon cluster's users group?

- A. Domain Users
- B. Local Users
- C. Everyone
- D. Domain Admins

Correct Answer: A

---

#### QUESTION 5

An implementation engineer has just joined an EMC Isilon cluster to an Active Directory domain. The System zone of the cluster is set to default values.

Which AD object is automatically added to the cluster's administrator group?

- A. Domain Admin group
- B. Domain Admin user
- C. Local Administrators group
- D. Local Administrator user

Correct Answer: A

---

#### QUESTION 6

A storage administrator is planning to perform a node firmware update on an EMC Isilon cluster. What should you do before installing a new firmware package?

- A. Remove any previously installed firmware package
- B. Remove any previously installed drive firmware
- C. Reboot each node before updating the firmware
- D. Remove any previously installed node firmware

Correct Answer: A

---

#### QUESTION 7

Which OneFS daemon is responsible for generating each user's identity token?

- A. Isassd
- B. Iwiod

C. srvsdc

D. netlogon

Correct Answer: A

---

#### QUESTION 8

What is the default limit for the total number of snapshots allowed on an EMC Isilon cluster?

A. 1,024

B. 2,048

C. 10,000

D. 20,000

Correct Answer: D

---

#### QUESTION 9

What are the access layers in EMC Isilon clusters?

A. Protocol, Authentication, Identity Assignment, and Permissions

B. Physical, Network, Transport, and Session

C. Network, Authentication, Identity Assignment, and Permissions

D. Physical, Network, Transport, and Application

Correct Answer: A

---

#### QUESTION 10

A customer wants to test the failover and fail back capabilities of their SmartLock directories using SyncIQ. What should you advise the customer?

A. Failover is a one-way event with SmartLock directories

B. Fail back is supported with SmartLock directories

C. Committed files on the target can be replicated back to the original source directories

D. SyncIQ can revert SmartLock directories on the source cluster

Correct Answer: A

---

### QUESTION 11

What is used to reduce the time to ACK to the client for synchronous writes?

- A. Endurant Cache
- B. L1 Cache
- C. FAST Cache
- D. L2 Cache

Correct Answer: A

---

### QUESTION 12

Which protocol or daemon is responsible for handling authentication in OneFS?

- A. Isassd
- B. Iwiod
- C. AD
- D. LDAP

Correct Answer: A

---

### QUESTION 13

What is one requirement to join multiple authentication sources through an access zone?

- A. Must belong to only the joined access zone
- B. Must use a common /ifs tree for all access zones
- C. Must belong to all access zones
- D. Must only join AD domains in the same forest

Correct Answer: A

---

### QUESTION 14

After enabling auditing on an EMC Isilon cluster, which configuration changes are tracked?

- A. Changes made through PAPI system only
- B. Changes made by a user in a shell only
- C. Changes made by root in a shell only

D. Changes made by a batch file only

Correct Answer: A

---

#### QUESTION 15

Which feature distinguishes SMBv2 from SMBv1?

A. Endurant file handler

B. Stateless protocol

C. Change notification

D. Packet signing

Correct Answer: A
