### QUESTION 1

If a servlet-based software module is not responding, what are two examples of log information provided in the servlet container logs for the Java Method Server and similar modules?

- A. data file I/O failures and SQL query response timing
- B. standard output and http request/response
- C. user authentication failures and record of application events
- D. RPC command trace information and Content Server response timing

Correct Answer: B

### QUESTION 2

A TCS-enabled repository has documents containing both legal and medical information about employees.

Such documents should only be accessible only by people that belong to both the LEGAL and MEDICAL groups.

Which ACL settings meet this requirement?

A.

user/group	permit type
LEGAL	RequiredGroup
MEDICAL	RequiredGroup

B.

user/group	permit type
LEGAL	RequiredGroupSet
MEDICAL	RequiredGroupSet

C.

user/group	permit type
LEGAL	AccessRestriction
MEDICAL	RequiredGroup

D.

user/group	permit type
LEGAL	ApplicationRestriction
MEDICAL	RequiredGroupSet

- A. Exhibit A
- B. Exhibit B
- C. Exhibit C

D. Exhibit D

Correct Answer: A

---

### QUESTION 3

What must exist in an API script to dump your repository?

- A. dump,c,dmr\_content
- B. dump,c,dmr\_containment
- C. create,c,dmi\_dump\_object\_record
- D. create,c,dm\_dump\_record

Correct Answer: D

---

### QUESTION 4

A system is running with a primary Content Server and multiple remote Content Servers. All sites are distant from the others on the network. All Content Servers project to the Connection Brokers at all sites. All proximity values are set to 1. What effect will this common proximity value have on the system?

- A. The Connection Brokers will be confused, and no connections will be allowed.
- B. There will be no effect on the system. This is the normal configuration for multiple Content Servers.
- C. The Connection Brokers will direct clients to connect with the Content Server having the lowest latency to the client.
- D. Performance will be variable for users because any client may connect with any Content Server at any location.

Correct Answer: D

---

### QUESTION 5

Your environment includes EMC Centera stores and turbo stores. Starting from Content Server 6.5, which feature can provide performance enhancement in retrieving content from the above file stores?

- A. Branch Office Caching Services (BOCS)
- B. Site Caching Services (SCS)
- C. Documentum Messaging Services (DMS)
- D. Accelerated Content Services (ACS) caching

Correct Answer: D

---

**QUESTION 6**

What are the minimum prerequisite components for a Documentum Administrator installation on a dedicated application server host?

- A. database client, application server, and Java SDK
- B. application server, Java SDK, and web server
- C. application server and Java SDK
- D. application server, Java SDK, PHP, and Perl

Correct Answer: C

---

**QUESTION 7**

Which statement regarding creating partitionable types is true?

- A. Subtypes of partitionable type are automatically created as partitionable types.
- B. When creating subtypes of a partitionable type, you must explicitly define the subtype as partitionable.
- C. Subtypes that are not partitionable can be created with partitionable types as their supertype.
- D. Partitionable types cannot have any subtypes.

Correct Answer: A

---

**QUESTION 8**

How do you trace SQL statements at the Content Server startup?

- A. trace,c,10,,SQL\_TRACE
- B. alter session set sql\_trace = true
- C. -osqltrace
- D. execsql,c,alter session set sql\_tace=true

Correct Answer: C

---

**QUESTION 9**

For distributed environments, which functionality is provided by the Documentum Messaging Services (DMS) Server?

- A. Synchronous Write, BOCS in Pull Mode
- B. Content pre-caching, Asynchronous Write

- C. Object Replication, Asynchronous Write
- D. Content pre-caching, BOCS in Push Mode

Correct Answer: B

---

#### QUESTION 10

Your team is testing a new DFC application that created permission sets and linked them to dm\_users. You discover, prior to an upgrade, that the developers deleted the dm\_users from the database, but left thousands of permission sets that now have non-existent users. What is one way that you could have discovered this issue before upgrading?

- A. by running dm\_DBWarning job
- B. by running consistency\_checker.ebs script
- C. by running dm\_DMclean job
- D. by running upgrade\_dmclean\_job.ebs script

Correct Answer: B

---

#### QUESTION 11

In Documentum Administrator (DA) 6.5 and later, what must be done to make all DA features visible to system administrators?

- A. No action is required; system administrators have access to all DA features.
- B. You must add all system administrators users to the group admingroup.
- C. You must create one or more administrator access sets and configure each to expose only those DA features which are needed.
- D. You must configure the user's extended privileges such that he/she has access to the desired DA features.

Correct Answer: C

---

#### QUESTION 12

Where do you enter the correct hostname for the SMTP server during an upgrade process?

- A. The Server Configuration tool will ask for a SMTP server hostname.
- B. Prior to the upgrade, you edit the smtp\_server attribute of dm\_docbase\_config.
- C. The Server Configuration tool will use the SMTP server hostname provided by the Connection Broker.
- D. Prior to the upgrade, you edit the mail\_notification attribute in server.ini.

Correct Answer: A

---

**QUESTION 13**

Which is a valid sequence of activities for cold repository backup?

- A. Content Backup--> dm\_DMClean Job --> dm\_FileScan Job --> Stop Repository --> Database backup-> Start Repository
- B. Stop Repository --> Database Backup--> Start Repository--> Content Backup--> dm\_DMClean Job->dm\_FileScan Job
- C. Stop Repository --> Content Backup--> Start Repository--> Database Backup--> dm\_DMClean Job--> dm\_FileScan Job
- D. dm\_FileScan Job --> Stop Repository --> Database backup --> Content Backup--> Start Repository--> dm\_DMClean Job

Correct Answer: D

---

**QUESTION 14**

Your system has a single Content Server in one location with users at a remote location. Remote users report that content takes a long time to download and that the WDK application performs adequately.

No servers are CPU or RAM constrained.

Which Documentum technology may be used to overcome this network limitation?

- A. Site Caching Services (SCS)
- B. Site Distribution Servers (SDS)
- C. Accelerated Content Services (ACS)
- D. Branch Office Caching Services (BOCS)

Correct Answer: D

---

**QUESTION 15**

Given an environment with multiple Connection Broker hosts and the following parameters in the dfc.properties file for a Documentum client: dfc.docbroker.auto\_request\_forward = T dfc.docbroker.search\_order = random Which statement is true about this environment?

- A. Communication requests from the client will be sent to the primary Connection Broker first. If that Connection Broker is unavailable, the secondary Connection Broker will be used.
- B. If the primary Connection Broker does not respond to the request, the communication request is immediately terminated and an error displayed.

C. One of the defined Connection Brokers in the dfc.properties is chosen at random by the requesting client. If it does not respond, the communication request is immediately terminated and an error displayed.

D. The client will randomly select any Connection Broker defined in the dfc.properties as the first recipient of the communication request.

Correct Answer: D
