QUESTION 1

What is a function of the ESRS Management Utility?

- A. Adds and approves SPA and SPB in ServiceLink
- B. Adds VNX Block system to the distributed monitoring agent
- C. Configures the portal system
- D. Applies the latest call home template to the Management Station

Correct Answer: A

QUESTION 2

Refer to the exhibit.

The screenshot shows the Remotely Anywhere login page. At the top is the logo. Below it is a box titled 'Windows Authentication' containing the instruction 'Please enter your Windows username and password.' There are three input fields: 'User name', 'Password', and 'Log on to' (a dropdown menu). A 'Login' button is to the right. Below this is an 'Options' section with three radio buttons, the first of which is selected. The options are 'Full interface (for DHTML capable browsers)', 'Light interface (for old browsers or slow connections)', and 'Select language' (a dropdown menu set to 'English'). At the bottom of the options section is a button '<< Hide advanced options'. At the very bottom of the page, a message reads 'There is no user at the target PC.'

A Platform Engineer wants to set up a RemotelyAnywhere session to one of the Storage Processors in order to download some SPCollects. Which option (not visible in the screenshot) will provide direct access to that function from

the Login screen?

- A. File Transfer
- B. Download SPCollects
- C. Downloads
- D. Retrieve files

Correct Answer: A

QUESTION 3

Which tool is required for all VNX upgrades but is available only to EMC employees and partners?

- A. VNX Procedure Generator
- B. Unisphere Service Manager
- C. SPcollect
- D. VNX Installation Toolbox

Correct Answer: A

QUESTION 4

- A. Serial
- B. Network
- C. IEEE 1394
- D. SAS

Correct Answer: D

QUESTION 6

While at a customer's site, you need access to a VNX Storage Processor on IP address 10.11.12.13. You want to use RemotelyAnywhere but <https://10.11.12.13> does not open the login screen.

Which port needs to be added to the URL?

- A. 9519
- B. 443
- C. 80
- D. 119

Correct Answer: A

QUESTION 7

What does "front end" refer to in reference to VNX storage processors?

- A. Fibre Channel connection to the hosts
- B. Connections to the LCCs, DAEs and physical drives
- C. Storage subsystem
- D. NAS clients in the production TCP/IP network

Correct Answer: A

QUESTION 8

When installing a VNX gateway in the Auto-Config mode, which step is optional?

- A. Create system RAID groups and LUNs for VNX File
- B. Configure fibre switch zoning for Data Movers
- C. Set up the Data Mover initiator records
- D. Set up VNX Block storage groups

Correct Answer: A

QUESTION 9

On the VNX Gateway platform, which I/O module slot and FC ports are reserved for tape devices?

- A. slot 0, ports 2 and 3
- B. slot 1, ports 2, and 3
- C. slot 0, ports 3 and 4
- D. slot 1, ports 1 and 2

Correct Answer: A

QUESTION 10

- A. SolVe Desktop tool
- B. VNX Installation Toolbox
- C. Unisphere Service Manager
- D. Unisphere Initialization Utility

Correct Answer: A

QUESTION 13

Refer to the exhibit.

EMC Unisphere Storage System Initialization Wizard

File Options Help

Use this screen to set the network parameters for the management ports (10/100/1000) on the storage system.

System serial number: FNM00130702376
System model number: VNX5600

Management Port (10/100/1000) Network Settings

Storage Processor A
IP Address: 1 . 1 . 3 . 1 Name: A-IMAGE
IPv6 Link Local Address:
IPv6 Global Address:

Storage Processor B
IP Address: 1 . 1 . 3 . 1 Name: B-IMAGE
IPv6 Link Local Address:
IPv6 Global Address:

IPv4 Common Parameters
Subnet Mask: 255 . 255 . 255 . 0
Default Gateway:

IPv6 Common Parameters
Configuration Type:
IPv6 Global Prefix:
IPv6 Default Gateway:

<<Back Next >> Cancel

What is a function of the IPv6 Common Parameters configuration type?

- A. Disables IPv6 addressing on the SPs
- B. Enables configuration of IPv6 in Unisphere
- C. Disables the reminder to reboot after the configuration is done
- D. Enables IPv4 addressing on the SPs

Correct Answer: A

QUESTION 14

You have been tasked with installing two unconfigured VNX5700 Unified storage systems:

System A will have one Control Station.

System B will have two Control Stations.

What uniquely identifies System A's Control Station from System B's in the VNX Installation Assistant?

- A. MAC
- B. Serial
- C. IP
- D. WWN

Correct Answer: A

QUESTION 15

Which script is run to verify the status of the VNX gateway after installation?

- A. nas_checkup
- B. nas_storage
- C. nas_summary
- D. nas_catalog

Correct Answer: A
