QUESTION 1

When would you use a column store table instead of a row store table? There are 2 correct answers to this question.

- A. When you require aggregation and analysis of values
- B. When the table has a small number of records
- C. When there are mainly distinct values in the table
- D. When you want to enable a full-text-search of the table

Correct Answer: AD

QUESTION 2

You execute a Native SQL query statement to retrieve a list of information using the corresponding ABAP Database Connectivity (ADBC) API method.

Which additional steps are necessary to retrieve the result set into an internal table? 2 answers

- A. Close the CL_SQL_STATEMENT object to release the resources.
- B. Use an Open SQL query that uses the JOIN between the result set and the internal table as a data source.
- C. Bind a reference to the internal table as an output parameter to the CL_SQL_RESULT_SET instance.
- D. Fetch the result using the next_package method of class CL_SQL_RESULT_SET.
- E. Fetch the result using the fetch method of class CL_SQL_EXECUTE.

Correct Answer: CD

QUESTION 3

Which of the following JOIN types are supported in Open SQL? 3 answers

- A. CROSS JOIN
- B. INNER JOIN
- C. REFERENTIAL JOIN
- D. LEFT OUTER JOIN
- E. RIGHT OUTER JOIN

Correct Answer: BDE

QUESTION 4

DB-Specific Properties that allows switching between storage types when running on an SAP HANA database. What are these storage types? There are 2 correct answers to this question.

- A. Column store
- B. Development Store
- C. Row store
- D. Technology store
- E. Re-use component store

Correct Answer: AC

QUESTION 5

What is the language SAP HANA is developed in?

- A. Assembly
- B. O
- C. C++
- D. Java

Correct Answer: C

QUESTION 6

Which system schema contains the list of Activated and inactive Objects? 2 answers

- A. Used to access local or remote database system
- B. Maintain, Monitor and test secondary database connection
- C. Use Schema for the Connections
- D. Maintain only HANA specific objects

Correct Answer: AB

QUESTION 7

You want to debug an ABAP program using ABAP development tools (ADT). How do you launch the debugger? Please choose the correct answer.

- A. Choose the debug as option in the context menu of the ABAP program

- B. Create a debug configuration for the ABAP application and run the program
- C. Set a breakpoint in the ABAP program and execute the program
- D. Choose the Run --> Debug options in the menu

Correct Answer: C

QUESTION 8

Which SAP HANA engine executes Calculation view? (2 answers)

- A. OLAP Engine
- B. Calculation Engine
- C. SQL Engine
- D. JOIN Engine

Correct Answer: BC

QUESTION 9

What are the advantages of column based tables? (3 correct answers)

- A. Bigger Data Set
- B. Better Compression
- C. Better parallel Processing
- D. Faster Data Access

Correct Answer: BCD

QUESTION 10

What is the main function of Static Code Analysis? Please choose the correct answer.

- A. To detect code that would lead to functional or performance issues When migrating to SAP HANA
- B. Integrates with SAP Solution Manager
- C. Integrated into ABAP Development Tools and ABAP Workbench
- D. ABAP source code with performance optimization potential

Correct Answer: A

**QUESTION 11**

You apply static code checks on your ABAP coding to find performance optimization potential and receive a message about a "Problematic SELECT * statement" issue. How can you improve the performance of your ABAP code?

- A. Use Native SQL to perform the SELECT * statement.
- B. Use the ABAP pragma ##OPTIMIZE_QUERY.
- C. Use the Open SQL SELECT RELEVANT statement.
- D. Use a field list containing only the relevant fields.

Correct Answer: D

QUESTION 12

According to the performance analysis recommendations; which steps are recommended after doing a database migration to SAP HANA?

- A. Perform regular performance scans on your ABAP custom coding as part of the development process.
- B. Perform regular performance scans on the ABAP coding delivered by SAP as part of your development process.
- C. Activate your ABAP custom coding, which was deactivated before the database migration, using U transaction SFW5.
- D. Switch the storage type of your custom database tables to column store and use the database utility (SE14) to perform the database table conversion.

Correct Answer: A

QUESTION 13

What are the key points that should be kept in mind while performing the Nonautomatic update in SAP HANA Transport Container? (2 answers)

- A. Changes to Delta Container
- B. You need to refresh the content of the container manually
- C. Automatic release of units
- D. Take snapshot manually before releasing of the container

Correct Answer: BD

QUESTION 14

What are the ABAP development guidelines? There are 2 correct answers to this question.

- A. Consuming Only ABAP contents for SAP HANA
- B. Improved tools for performance analysis
- C. Improved hybrid components for SAP HANA
- D. Extensions to ABAP Language

Correct Answer: BD

QUESTION 15

Which components can be a part of a calculation view? (2 answers)

- A. BAPIs
- B. Analytic View
- C. Tables
- D. Attribute View

Correct Answer: CD
