QUESTION 1

A customer wants to change the default blue color on a bar chart. What is the easiest way to change blue to another color?

- A. Use conditional formatting under the bar chart widget properties by selecting the dimension.
- B. Use conditional formatting under the bar chart widget properties by selecting the measure.
- C. Use bindings to specify a color per bar.
- D. Create a compare table formula to specify a hidden metric for coloring purposes.

Correct Answer: B

QUESTION 2

Before using bindings, you can try using facets to specify interactions between widgets.

- A. False
- B. True

Correct Answer: B

QUESTION 3

What are two core design principles to consider when building Analytics apps or dashboards? Choose 2 answers

- A. Emphasis: make sure they have space for important information, such as headlines and key charts.
- B. Clarity: make sure they are uncluttered and easy to interpret.
- C. Consistency: make sure they have a sense of familiarity to strengthen your users\' ease of use.
- D. Balance: make sure they have a balance of different charts to get a more interesting design.

Correct Answer: BC

QUESTION 4

Which three things can be done with the Einstein Analytics Dashboard Inspector? Choose 3 answers

- A. Automatically remove bottlenecks to make queries run faster.
- B. Get a list of recommendations on how to improve the performance of the dashboard.

- C. View all queries and the time it took to run each one.
- D. View the total time required to run all queries.
- E. See the final query for each step along with query results.

Correct Answer: BCE

QUESTION 5

Which of the following are included in the template object?

- A. ui.json
- B. app.json
- C. variables.json
- D. A,B and C
- E. A,C

Correct Answer: E

* template-info.json manages all elements of your template, including metadata information about the template, the Analytics objects that define dashboards and lenses, and the other files that are part of the template.* ui.json manages the configuration wizard that drives app creation. It defines the number of wizard pages, the order of wizard questions, and any messages you want the user to see.* variables.json contains all template variables, including text for wizard questions and specifications for the answers. Variables also define conditional questions. For example, you may want some questions to appear in the wizard only if an org contains certain data. Or you might want to add more specific questions based on the answers to more general wizard questions.* template-to-app-rules.json defines the rules the template follows. For example, you could define a rule that specifies that if an org doesn't use certain Salesforce objects, the app won't refer to them in dashboards or include them in the dataflow. Rules also define how variables are handled. For example, if the wizard asks which fields to include in filters for accounts, template-to-app-rules.json determines how that choice is reflected in dashboards.

QUESTION 6

A dataset is ready for analysis in Einstein Discovery.

What is the first step a consultant should take after the data is loaded?

- A. Identify data types and define the appropriate data as numeric.
- B. Analyze data columns and decide which, if any, to drop.
- C. Produce a graph of the data to analyze.
- D. Load the data into Einstein Analytics

Correct Answer: A

**QUESTION 7**

A large company has a single dataset that contains the attainment and commission fields for all sales reps. Each sales rep should be able to view the attainment data for each rep in their division. Each rep should only be able to see their own commission data.

Which option should be used to enforce this requirement?

- A. Create separate datasets for attainment and commission and apply security predicates and/or sharing inheritance.
- B. Apply a security predicate on the existing single dataset.
- C. Use sharing inheritance.
- D. Add the sales organization to the attainment dataset access list.

Correct Answer: A

QUESTION 8

A consultant built an Einstein Analytics app for the Sales Operations team. The Sales Operations team wants to share their app with other people at the company. The consultant recommends distributing the app as an Einstein Analytics template app.

What can the consultant do to give the Sales team more choices and options with future apps that are generated from the Sales Operations app\'

- A. Update contents in the Sales Operations app and changes will be pushed down to its generated apps.
- B. Ensure the Sales team has the necessary permissions to customize their apps.
- C. Create a configuration wizard for the app.
- D. Update contents in the Sales Operations app and create new template versions of the app.

Correct Answer: C

QUESTION 9

After loading data to Einstein Discovery and creating a story, the client asks the Einstein Consultant to explain the "Unexplained Bar" in the "Why it Happened" chart.

Which explanation is correct?

- A. It should always be 0 or the model should not be used.
- B. It shows the difference between the predicted outcome and the observed outcome.
- C. It displays the difference between the analyzed data and the data not reviewed.

D. It only appears for outcomes that do not have an explanation.

Correct Answer: B

QUESTION 10

You can get data into Einstein Discovery: A. By connecting a USB drive to your laptop

B. By using an Einstein analytics dataset

C. Only if your database administrator does it for you

D. Only if Salesforce does it for you

Correct Answer: B

QUESTION 11

Which widget property allows a consultant to restrict the view to a domain bounded by the values entered\\

A. Add Custom Domain

B. Filter by Range

C. Add Custom Range

D. Add Filter

Correct Answer: A

QUESTION 12

What are two main steps for creating a dataset?

A. Run and monitor

B. Plan and map

C. Extract and prepare

D. Build and explore

Correct Answer: C

QUESTION 13

What can you do on the Edit Field Attributes page when uploading a CSV file to Analytics?

- A. Change a field's name
- B. Change a field's format
- C. Change a field's type
- D. All of the above

Correct Answer: D

QUESTION 14

A Senior Sales Business Analyst asks for a dashboard that contains fiscal year product opportunities. Information is maintained in a spreadsheet which is comprehensive, but its contents often need to be explained. After sketching the dashboard, the consultant is ready to start building.

Which concept should be applied to this dashboard?

- A. Limit widget actions and exploration so users will focus only on the high-level information.
- B. Use the different chart types to make the dashboard interesting and appealing.
- C. Design the dashboard with the desktop in mind and use the same layout for mobile devices for consistency.
- D. Use charts to help users ask questions, not illustrate a conclusion.

Correct Answer: D

https://help.salesforce.com/articleView?id=bi_dashboard_build_tips.htm&type=5

QUESTION 15

A customer displays a lot of data and wants a way to dynamically emphasize certain values on a bar chart in order to properly grab the user's attention.

What can an Einstein Consultant use to accomplish this task?

- A. Customize tooltip
- B. Chart Markers
- C. XMD
- D. Compare Table

Correct Answer: C
