- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

The following incorrect way to create a virtual machine template is.

- A. Template clone to template
- B. Virtual machine clone as a template
- C. Virtual machine to template
- D. Snapshot to template

Correct Answer: D

---

### QUESTION 2

If an enterprise uses a hybrid cloud, the devices that cannot be used as the demarcation point between public and private clouds are

- A. Core switch
- B. Firewall
- C. Virtual switch
- D. Flow cleaning equipment

Correct Answer: AC

---

### QUESTION 3

In Huawei FusionCompute, the following incorrect description of the security group rule is.

- A. When a virtual machine has multiple network cards, you can configure a security group for each network card.
- B. A virtual machine can communicate with the outside world only after a security group is created and rules are added.
- C. All virtual machine NICs in the same security group will use the security group rules for access control
- D. The essence of a security group is a collection of rules

Correct Answer: B

---

### QUESTION 4

The following are not KVM (Kernel-Based Virtual Machine) management tools: ()

- A. QEMU

B. Virsh instruction set

C. Virt-Manager

D. Libvirt

Correct Answer: A

---

### QUESTION 5

The following description about making templates in FusionCompute is incorrect .

A. "Virtual machine to template" is to directly convert a virtual machine into a template, all parameters use the current configuration of the virtual machine The virtual machine will no longer exist after conversion

B. When using a virtual machine to make a template, the status of the virtual machine can be "running"

C. "Clone a template as a template" is to copy the template as a new template and support adjustment of some parameter configurations, which can be slightly different from the original template The difference is that the template still exists after cloning is complete

D. "Clone a virtual machine as a template" is to copy the virtual machine as a template and support adjustment of some parameter configurations, which can be compared with the original virtual machine. The virtual machine is slightly different. The virtual machine still exists after cloning is complete.

Correct Answer: B

---

### QUESTION 6

In Huawei FusionCompute, if the Windows virtual machine has a blue screen, what operations can the system perform? [Multiple choice]

A. HA Virtual Machine

B. Recover a virtual machine using a snapshot

C. Restart the virtual machine

D. Not processed

Correct Answer: ACD

---

### QUESTION 7

For FusionCompute, the following incorrect description of the template format is

A. .ovf is the description file of the virtual machine and .vhd is the disk file of the virtual machine

B. The virtual machine template format is divided into two types: ova and ovf.

C. ovf format template contains only one ovf file and one vhd file

D. Format template contains only one file after export

Correct Answer: D

---

#### QUESTION 8

In FusionCompute, the virtual network adapter of each virtual machine is connected to the port of the virtual switch. In order to facilitate the user to configure and manage multiple ports at the same time, divide the ports with the same network attributes into the same port group

A. TRUE

B. FALSE

Correct Answer: A

---

#### QUESTION 9

In Huawei FusionCompute, if there is only one physical network port in the bound network port, the physical network port cannot be removed directly.

A. True

B. False

Correct Answer: A

---

#### QUESTION 10

The following description is incorrect A. Each file system block corresponds to a discontinuous area on the physical disk.

B. The file is stored on the file system, and the file system is mapped to the file system block.

C. The file system block corresponds to the logical area of LVM

D. The logical area is mapped to the physical area of the disk through LVM

Correct Answer: A

---

#### QUESTION 11

Storage virtualization technology can improve storage utilization and provide storage resources for multiple virtual machines.

A. Yes

B. wrong

Correct Answer: A

---

#### QUESTION 12

Intelligent memory reuse technology (memory bubble, memory swap, memory sharing) can be customized to turn on / off any of the functions according to customer needs

- A. Yes
- B. wrong

Correct Answer: B

---

#### QUESTION 13

Virtualization description is correct

- A. VMM runs in Guest Machine
- B. VMM runs directly on Host Machine
- C. VMM runs on Guest OS
- D. VMM runs on Host OS

Correct Answer: D

---

#### QUESTION 14

In Huawei FusionCompute, the way to create a virtual machine is (multi-select)

- A. Other virtual platform import
- B. deployment using templates
- C. clone using an existing virtual machine
- D. Create a new virtual machine directly

Correct Answer: BCD

---

#### QUESTION 15

As FusionCompute, which one of the following options do not belong CPU resources QoS parameters?

- A. CPU share of resources
- B. CPU resource limits

C. CPU resource reservation

D. CPU resource reuse

Correct Answer: D
