-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

IoT devices can be connected to the Internet and can be controlled via the Internet.

- A. TRUE
- B. TRUE

Correct Answer: A

QUESTION 2

The following are not part of snapshot management.

- A. Copying a snapshot
- B. Modifying a snapshot
- C. Create a snapshot
- D. Delete a snapshot

Correct Answer: A

QUESTION 3

The following description of big data and cloud computing is.

- A. Cloud computing is a collection of data that cannot be captured, managed, and processed with conventional software tools within a certain time frame
- B. Big data is a pay-as-you-go model that provides usable, portable, and on-demand network access
- C. Cloud computing cannot function as the underlying computing resource for big data processing
- D. Big data can serve as a type of cloud computing service for users to choose according to their needs

Correct Answer: D

QUESTION 4

Which of the following technologies on a switch can increase link speed?

- A. LDAP
- B. LACP
- C. VLAN

D. VXLAN

Correct Answer: B

QUESTION 5

If two virtual machines can ping each other, the network device that will be used in the communication process is

- A. Distributed Virtual Machine Switch
- B. Physical switch
- C. Physical network card
- D. Virtual network card

Correct Answer: D

QUESTION 6

In Huawei FusionCompute, adjusting virtual machine specifications is not supported when cloning a virtual machine.

- A. TRUE
- B. FALSE

Correct Answer: B

QUESTION 7

ISCSI is a standardized protocol based on the _____ protocol and the SCSI instruction set. It is widely used in many storage networks using the _____ architecture.

- A. FC IP SAN
- B. TCP / IP FC SAN
- C. FC FC SAN
- D. TCP / IP IP SAN

Correct Answer: D

QUESTION 8

Artificial intelligence is the research and development of concepts, methods, technologies and application systems for simulation extension and expansion of artificial intelligence. A new technology science, the following false statement about artificial intelligence is

- A. Artificial intelligence does not have the dynamic creativity unique to human consciousness
- B. Artificial intelligence is a technology for items to communicate with each other through the network
- C. Artificial intelligence is not social
- D. Physical processes that are unconscious mechanical

Correct Answer: B

QUESTION 9

What is right about VNC is (multiple choice) A. VNC needs to support Linux operating system

- B. The controlled computer needs to install the corresponding software to become a VNC server
- C. VNC is a lightweight remote control software
- D. The host that initiates the control request needs to install the corresponding software to become a VNC server

Correct Answer: BC

QUESTION 10

RAID 6 on the basis of enhanced RAID 5 disk fault tolerance, can allow two disk failures, but not less than the number of disks required 4

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 11

In Huawei FusionCompute, the correct description of the method for logging in to the virtual machine is . [Multiple choice]

- A. The virtual machine does not have an IP address, and the administrator can log in through VNC. so VNC gets rid of its dependence on the network
- B. If the operating system of the virtual machine is windows, the administrator can log in to the virtual machine through remote desktop
- C. Administrators can log in to a virtual machine with any operating system installed through VNC
- D. If the operating system of the virtual machine is Linux, the administrator can log in to the virtual machine through remote desktop

Correct Answer: BC

QUESTION 12

In Huawei FusionCompute, which of the following actions takes effect immediately?

- A. Read and write directly to the newly bound disk
- B. Install Tools
- C. Disk capacity reduction
- D. Remove the network card

Correct Answer: D

QUESTION 13

The following description about virtualized storage and non-virtualized storage is correct

- A. Virtualized storage is more secure than non-virtualized storage
- B. Virtualized storage is better than non-virtualized storage
- C. Read and write performance of non-virtualized storage is better than virtualized storage
- D. Non-virtualized storage scales better than virtualized storage

Correct Answer: C

QUESTION 14

. Where is the memory reuse function enabled in Huawei FusionCompute?

- A. Host
- B. operating system
- C. virtual machine
- D. Cluster

Correct Answer: D

QUESTION 15

The following description of distributed storage is correct A. The disks of the distributed storage come from the x86 architecture disk array.

- B. The disk of the distributed storage comes from a personal PC

- C. The disks of the distributed storage come from x86 architecture servers
- D. The disks of the distributed storage come from the x86 architecture virtual machine

Correct Answer: C
