

H13-621^{Q&As}

HCNP-Storage-CUSN(Constructing Unifying Storage Network)

Pass Huawei H13-621 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass4itsure.com/h13-621.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

For asynchronous remote replication of storage array, which of the following limited number of the added subordinate LUN is correct?

- A. can add at most 1 subordinate LUN
- B. can add at most 2 subordinate LUN
- C. can add at most 4 subordinate LUN
- D. can add any subordinate LUN

Correct Answer: A

QUESTION 2

When centrally manage asynchronous remote copy homework through HostAgent, proposed to set asynchronous remote replication time length to:

- A. manual
- B. at the beginning of the synchronization time waiting
- C. at the end of the synchronous time waiting
- D. automatic

Correct Answer: A

QUESTION 3

The remote copy of storage array, which of the following LUN cannot be as the subordinate LUN of remote replication? (Select 3 Answers)

- A. the main LUN of other remote replication
- B. the subordinate LUN of other remote replication
- C. the newly created, is formatted and unused LUN
- D. the target LUN of LUN copy

Correct Answer: ABD

QUESTION 4

Before configuring the remote replication, need to establish a physical link connection between the local array and remote array, a controller of the back-end storage system cannot be connected the two controllers of the remote storage

system at the same time.

- A. True
- B. False

Correct Answer: A

QUESTION 5

SMI-s is initiated and led by SNIA (global network storage industry association), and is standard management interface which is commonly developed by a number of storage manufacturers.

- A. True
- B. False

Correct Answer: A

QUESTION 6

About the iSCSI protocol, which description of the following are right? (Select three Answers)

- A. iSCSI is based on IP protocol proposed by Microsoft technical standards
- B. iSCSI support users through its access IP SAN storage network
- C. iSCSI essence is SCSI commands and data transmission in IP frame format
- D. iSCSI protocol based on SCSI and TCP/IP

Correct Answer: BCD

QUESTION 7

Because SAS is serial SCSI, therefore its transmission rate is usually lower than parallel SCSI.

- A. True
- B. False

Correct Answer: B

QUESTION 8

Which component is responsible for connecting to the array to distribute in-band command in HostAgent?

- A. HyperManager server

- B. InbandAgent
- C. ConsistentAgent
- D. HyperManager client

Correct Answer: B

QUESTION 9

Which of the three dimensions are System reliability mainly defined from?(Select 3 Answers) A. requiredconditions

- B. required time
- C. required function
- D. availability

Correct Answer: ABC

QUESTION 10

On which component UltraPath multipath software is deployed in the network?

- A. OS server
- B. switch
- C. storage arrays
- D. storage virtualization platform

Correct Answer: A

QUESTION 11

Through which two ways can detect the hard disk bad way in OceanStor storage system? (Select two Answers)

- A. read/write failure automatic analysis
- B. hard disk medium active scan
- C. power test
- D. business data flow anomaly detection

Correct Answer: AB

QUESTION 12

For snapshot , LUN copy and remote replication of storage array, which of the following statement is true? (Select 3 Answers)

- A. add resources LUN in resource pool, controller A and B both added and equal size, which is the best
- B. create LUN copy if confusing the source LUN and target LUN may result in data loss
- C. create remote copy if confusing the source LUN and target LUN may lead to the data unavailable
- D. if the space of the resource pools is insufficient, system will automatically use the residual capacity of safe space as a resource pool space

Correct Answer: ABC

QUESTION 13

Remote replication between storage array is based on the copy file level

- A. True
- B. False

Correct Answer: B

QUESTION 14

Which of the following description of the FC protocol layer is wrong?

- A. FC-0 is the physical layer to complete data transceiver
- B. FC-1 is responsible for encoding and decoding
- C. FC-2 is the public service
- D. FC-4 is the application layer

Correct Answer: C

QUESTION 15

The role of HostAgent does not include:

- A. will write the cache data of host to the hard disk
- B. centrally manage value-added features of storage
- C. configure asynchronous remote replication by HostAgent
- D. specify time strategy for value-added function

Correct Answer: C
