H13-622^{Q&As}

HCNP-Storage-CBDS (Constructing Big Data Storage)

Pass Huawei H13-622 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

https://www.pass4itsure.com/h13-622.html

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei Official Exam Center

⚙ **Instant Download** After Purchase

⚙ **100% Money Back** Guarantee

⚙ **365 Days** Free Update

⚙ **800,000+** Satisfied Customers

QUESTION 1

Which of the following statements about the characteristics of the file system snapshot feature provided by an N8500 clustered NAS system are incorrect? (Select two.)

A. A snapshot and the file system each use independent storage space to ensure data reliability.

B. A file system snapshot is a view identical with the file system.

C. File system snapshots are readable, writable, and independent of the file system.

D. You can create multiple snapshots for a file system. However, you cannot create a snapshot for an existing snapshot.

Correct Answer: AD

QUESTION 2

In the OceanStor 9000, a node pool is a collection of nodes that have the same characteristics such as physical type and access performance, and DST allows a user to divide physical nodes in the same file system into node pools.

A. True

B. False

Correct Answer: A

QUESTION 3

Which functions are provided by InfoAllocator for OceanStor 9000 administrators? (Choose all that apply.)

A. Properly planning users.

B. Managing and monitoring users

C. Collecting statistics and querying user information.

Correct Answer: ABC

QUESTION 4

Which of the following are the APIs supported by HDFS Plugin? (Choose all that apply.)

A. Shell API

B. API

C. HTTP REST API

D. Java API

Correct Answer: AB

QUESTION 5

Which file sharing interface is not provided by Huawei OceanStor 9000?

A. Object

B. NFS

C. CIS

D. FTP

Correct Answer: A

QUESTION 6

If the back-end storage performance of an N8500 storage system deteriorates, which of the following items can be skipped during troubleshooting?

A. Whether the sharing services are disabled

B. Whether the batteries on the storage units are faulty

C. Whether a link between the engine and a storage unit is down

D. Whether the storage system has slow disks

Correct Answer: A

QUESTION 7

Which of the following statements about AK/SK authentication process is incorrect?

A. When a user sends a data request, the OceanStor 9000 uses the hash-based message authentication code HMAC algorithm to encrypt SK and request content, and then generates a signature.

B. After receiving the request and signature, the OceanStor 9000 uses AK to query SK.

C. After SK is queried, the OceanStor 9000 uses the MDS algorithm to encrypt SK and request content, and then generates a signature.

D. The OceanStor 9000 compares the received signature with the one that calculated by the system. If the two signatures are consistent, the authentication succeeds.

Correct Answer: C

QUESTION 8

The CIFS sharing of the OceanStor 9000 supports local user authentication and AD domain user authentication.

A. True

B. False

Correct Answer: A

QUESTION 9

Through project management, role management, and user management, FusionStorage file sharing authentication grants user permissions to access and use storage resources.

A. True

B. False

Correct Answer: B

QUESTION 10

Offline software version upgrade of Huawei OceanStor 9000 interrupts services. The service downtime varies depending on the upgrade duration.

A. True

B. False

Correct Answer: A

QUESTION 11

Which of the following statements about the simple file system of the N8500 clustered NAS storage systems is incorrect?

A. Data of a simple file system is stored in sequence on the data disks where the file system resides.

B. A simple file system reads and writes multiple subdisks simultaneously, providing higher performance than reading and writing a single disk.

C. The volume of a simple file system is formed by the subdisks of multiple data disks.

D. The simple file system is applicable to scenarios having no special performance or security requirements.

Correct Answer: B

QUESTION 12

In the cluster communication architecture employed by an N8500 clustered NAS system, modules such as the resource agent, HAD, GAB, and Low Latency Transport (LLT) must collaborate to implement cluster communication.

Which of the following statements about the work mechanisms of these modules are correct? (Select three)

A. The agent monitors the resources of each system and provides the status information for the HAD of each machine.

B. If a cluster node is abnormal or faulty, the HAD takes correct actions, for example, performing a failover.

C. The GAB implements a point-to-point communication mechanism. The master node sends the other cluster nodes the information that needs to be synchronized.

D. LLT is a MAC-layer protocol unrelated to IP layer.

Correct Answer: ABD

QUESTION 13

Which are the possible causes for file read/write performance decrease? (Select three)

A. A slow disk or bad sector exists,

B. The Fibre Channel port has a high bit error rate.

C. The LUN has been set to write back.

D. The prefetch policy does not apply to service data changes.

Correct Answer: ABD

QUESTION 14

What is the minimum number of nodes required for deploying an OceanStor 9000 cluster?

A. 2

B. 3

C. 4

D. 5

Correct Answer: B

QUESTION 15

Which of the following service ports are provided by an N8500 clustered NAS system? (Select two.)

A. GE

B. 10GE

C. Fibre Channel

D. SAS

Correct Answer: AB
