100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

The InfoLocker feature of OceanStor 9000 can be used to meet the business scenario of one write and multiple read.

- A. True
- B. False

Correct Answer: A

QUESTION 2

When planning and designing storage projects, which of the following are more basic stages ()

- A. Outline design stage
- B. Conceptual design stage
- C. Research phase
- D. Physical design stage

Correct Answer: ABCD

QUESTION 3

Multiple choice The health status of the Huawei Oceanstor 9000 system cluster includes: (multiple choice)

- A. normal
- B. failure Part
- C. is damaged
- D. Downgrade

Correct Answer: ABCD

QUESTION 4

Engineer A finds an abnormality in the storage during the daily inspection, and calls the Huawei technical support hotline for help, and technical support instructs engineer A

Complete the collection of information of the business host. The operating system of the business host is Linux, which of the following collected commands are correct ()

- A. Execute the upadmin show vlan command to query all or specified virtual disk information
- B. Execute the rpm -qa|grep UltraPath command to check whether the multipath software is completely installed. If the system displays the UltraPath Relevant information indicates that it has been installed
- C. Execute service firewall stop to turn off the firewall
- D. Execute the upadmin show upconfig command to view the multipath configuration

Correct Answer: ABD

QUESTION 5

The initial data capacity of an application is 500GB. The backup frequency is 1 full backup every week, 6 additional backups, full backup and additional backup The data retention period is 4 weeks, and the redundancy ratio is 20%. Then the back-end storage capacity for 4 weeks is:

- A. 3320GB.
- B. 3504GB.
- C. 4380GB.
- D. 5256GB.

Correct Answer: D

QUESTION 6

When single-selecting the Oceanstor 9000 network tuning, which of the following commands can check whether the network port is connected?

- A. ifconfig
- B. ethtool
- C. lspci |grep Ether

Correct Answer: B

QUESTION 7

In Huawei distributed storage, SCSI volumes with multiple mount points are called shared volumes, and iSCSI volumes are all shared volumes. In order to support Shared volume backup capability, block service also supports snapshots of shared volumes, and the snapshot process of shared volumes is the same as that of ordinary volumes.

- A. True
- B. False

Correct Answer: A

**QUESTION 8**

In the Huawei data protection plan, the failure types are divided into multiple selection logic errors, equipment failures, data center failures, and zone failures. Territorial disaster. Among them, the ones with the highest "annual frequency" and "single loss" are: (multiple choice)

- A. Logic error
- B. Equipment failure
- C. Data center failure
- D. Regional disaster

Correct Answer: AD

QUESTION 9

Single choice The inforeplicator feature of Oceanstor 9000 (C30) product can support synchronous and asynchronous remote replication at the same time.

- A. True
- B. wrong

Correct Answer: B

QUESTION 10

What thresholds can be set for eReplication? (multiple choice)

- A. CPU utilization
- B. Memory utilization
- C. Hard disk utilization
- D. Band width

Correct Answer: ABC

QUESTION 11

Regarding the multi-NameNode concurrency characteristics of Huawei's distributed storage products, which of the following statements are correct ()

- A. The number of files supported by multiple Active NameNodes is no longer restricted by the memory of a single node

- B. Multi-directory metadata operations multi-node full concurrency
- C. Avoid metadata service interruption caused by traditional HDFS NameNode switching
- D. Multiple Active NameNodes provide metadata services, real-time consistent data among multiple nodes

Correct Answer: ABCD

QUESTION 12

Multiple choice Expressway reconstruction project A adopts the LightDC ROBO branch solution of Huawei's hyper-converged storage, The options reflect the advantages of the program ()

- A. Unified monitoring and management
- B. Highly integrated, saving space
- C. Rapid deployment
- D. Quick release of business

Correct Answer: ABCD

QUESTION 13

Which one of the following descriptions about InfiniBand technology is wrong?

- A. InfiniBand technology has the advantages of high bandwidth, low latency, and good system scalability
- B. InfiniBand technology is often applied to the connection between the server and the server
- C. InfiniBand technology will be widely promoted in Internet network connection
- D. Switch is the basic component in InfiniBand structure

Correct Answer: C

QUESTION 14

In scenarios where customers have high requirements for file read and write performance, if the performance calculation application scenario, the backend of Oceanstor 9000 has been With 10GE networking, what type of network should customers recommend for the front- end business network? (Multiple choice)

- A. 0GE networking
- B. Old network
- C. GE networking

D. FC networking

Correct Answer: AB

QUESTION 15

Which feature can provide file system snapshot features?

A. InfolLocker

B. InfoStamper

C. NfoProtector

D. InfoEqualizer

Correct Answer: B
