#### QUESTION 1

DCS is mainly used for hot data caching to improve data access capabilities and reduce database pressure.

A. Yes

Correct Answer: A

---

#### QUESTION 2

Which of the following is not a benefit of using cloud middleware services? () [Multiple choice questions]

A. Out of the box

B. Reliable and safe

C. Automatic upgrades and patches

D. After using middleware services, enterprises need to invest a lot of manpower to maintain middleware software

Correct Answer: D

---

#### QUESTION 3

What does Huawei Cloud Ecology include? () [Multiple choice questions]

A. Partner

B. Cloud community

C. Cloud Market

D. Training and certification

Correct Answer: ABCD

---

#### QUESTION 4

What is the role of the Dockerfile file used when the application is compiled and built in the software development cloud (DevCloud)?

A. Make application image

B. Cloud user authentication

C. Manage project dependency packages

D. Save configuration parameters

Correct Answer: C

---

#### QUESTION 5

The general principles of cloud architecture design are: ()

- A. Fault-tolerant design considering system failure.
- B. Application using loosely coupled and stateless design.
- C. Scalable and auto-scaling design.
- D. Considering security factors in design principles.

Correct Answer: A

---

#### QUESTION 6

Cloud architecture design is very flexible and does not require mastering UML. () [Multiple choice questions]

- A. True
- B. False

Correct Answer: B

---

#### QUESTION 7

The name of Huawei Cloud Enterprise Integration Platform ROMA means "all roads lead to Rome", which can connect enterprises

IT systems, data, messaging, APIs, equipment, cloud services, providing a unified application and data integration platform.

- A. Truecorrect
- B. False

Correct Answer: A

---

#### QUESTION 8

Microservices developed using the CSE Microservices Framework SDK are deployed to ServiceStage, how can they be called by other service discovery? () [Point: 5]

- A. developers need to install the service center by themselves to provide service registration and service discovery services.
- B. directly use the service center deployed by the cloud platform to register and discover services.

Correct Answer: B

---

#### QUESTION 9

Which of the following is the function of Huawei Cloud Distributed Messaging DMS service? () [Multiple choice questions]

- A. Key-Value data cache
- B. Database horizontal extension
- C. Mass transaction
- D. Module asynchronous decoupling

Correct Answer: D

---

#### QUESTION 10

Which of the following scenarios are typical applications of DMS?

- A. Handle user upload tasks
- B. Report generation
- C. Log transfer
- D. Push notification

Correct Answer: ABCD

---

#### QUESTION 11

In the tenth year of "Double Eleven", it has evolved into a national carnival for all e-commerce platforms. Which of the following services can be applied to e-commerce "promotion" and "purchase" scenarios?

- A. Cloud Container Engine CCE: Flexible elastic scaling strategy to cope with changing sudden surges.
- B. Microservice engine CSE: Support microservice interface level SLA Indicator monitoring and governance (load balancing, automatic fault tolerance, service degradation, and service current limit) to ensure continuous application operation.
- C. Application Performance Management APM: Provides end-to-cloud application performance tracking capabilities, through application panoramic topology, real-time monitoring and rapid fault diagnosis.
- D. Cloud performance test CPTS: One-stop performance test solution Discover system bottlenecks. Correct

Correct Answer: ABCD

---

**QUESTION 12**

Huawei Cloud Application Performance Management Service uses bytecode enhancement technology to achieve non-intrusive collection of user application performance index data. Users deployed an application developed in C language on Huawei Cloud, and can also use Huawei Cloud APM services to analyze their performance. Performance management services to analyze their performance issues. () [Single-choice question]

Option Subtotal Proportion

- A. True
- B. False

Correct Answer: B

---

**QUESTION 13**

Which of the following are the key features of Huawei CCE Cloud Container Engine?

- A. Application full-stack modeling
- B. Resource attribute description
- C. Resource scheduling algorithm
- D. Resource management across IaaS layers

Correct Answer: BCD

---

**QUESTION 14**

Which of the following are the application scenarios of Huawei Cloud APM (Application Performance Management Service)? (Multiple choices)

- A. Analyze transaction status by Apdex value
- B. One-click deployment of applications to the cloud using templates
- C. Tracking root causes of problems through call chains
- D. Master application health status through topology diagram

Correct Answer: AC

---

**QUESTION 15**

What are the benefits of using containers for business? ()

- A. suitable for agile expansion and reduction scenarios
- B. Reduced application launch time

C. Reduced application deployment costs

D. Improved security for business

Correct Answer: ABC
