QUESTION 1

Which Heroku feature allows you to deploy a real app complete with code, config, and add-ons already configured?

- A. Heroku Getting Started guides
- B. Heroku Deployment wizard
- C. git push heroku master
- D. Heroku Buttons

Correct Answer: D

QUESTION 2

A customer needs to test a database schema migration. Which approach should an Architect recommend?

- A. Fork the production database, and run the migration and tests against the fork
- B. Detach the Heroku Postgres add-on, and run the migration and tests against the database.
- C. Create a follower database, and run the migration and test against the follower database
- D. Place the app into maintenance mode, and then perform the tests

Correct Answer: A

QUESTION 3

Universal Containers wants to limit the total cost of their Heroku usage while they're getting started on the platform. To accomplish this, they are considering replacing certain add-ons with comparable open-source components, but the development team doesn't want to lose access to certain features that the add-ons provide.

Which option should an Architect recommend for reducing add-on costs without affecting feature availability?

- A. Remove aliases for high-cost add-ons.
- B. Share a single instance of a compatible paid add-on across multiple applications.
- C. Remove data store add-ons from the staging and development versions of the applications.
- D. Migrate add-ons to free plans.

Correct Answer: C

**QUESTION 4**

A client has an e-commerce application that stores creditcard information. The application will run the production. Which security certification does the application need to meet?

- A. ISO 27017
- B. PCI level 1
- C. SOC2TypeI
- D. ISO 27018

Correct Answer: B

QUESTION 5

Universal Containers (UC) has a Heroku Postgres database attached to a Heroku app, which is running in the Common Runtime. What should an Architect recommend UC do to secure their database to only trusted locations?

- A. Move the database and the app into the Private Space.
- B. Add a Trusted IP range to the Heroku Postgres configuration.
- C. Set up a VPN from the trusted locations to the app.
- D. Set up a VPC in a one-off dyno when access to Heroku Postgres is needed.

Correct Answer: B

QUESTION 6

Universal Containers (UC) uses Heroku Connect to synchronize changes to the Account object in their Salesforce org. UC's Heroku application makes a batch update that changes one million records to the Heroku Postgres database table that mirrors the Account object. Approximately, how long will these updates take to sync back to the Salesforce org?

- A. It depends on the sync performance, which can vary from one connection to another.
- B. 1 hour.
- C. One million updates is too many for Heroku Connect to handle; therefore, the sync will fail
- D. 12 hours.

Correct Answer: A

<https://devcenter.heroku.com/articles/using-sso-services-with-heroku#prerequisites-for-sso-with-heroku>

**QUESTION 7**

For which two use cases should an Architect recommend using Heroku Redis? (Choose two.)

- A. Providing long-term data warehousing
- B. Adding jobs to a queue
- C. Providing a data cache layer
- D. Querying relational data

Correct Answer: AD

QUESTION 8

A client is running an app on 20 Standard-2x dynos. They are noticing highly variable performance when the application is experiencing a heavy load. Which two suggestions should an Architect make in this scenario? (Choose two.)

- A. Configure the app to use Standard-1x dynos.
- B. Configure the app to use Performance dynos.
- C. Install a performance monitoring tool.
- D. Add additional Standard-2x dynos.

Correct Answer: BD

Reference: <https://devcenter.heroku.com/articles/optimizing-dyno-usage>

QUESTION 9

Which is a characteristic of an add-on that is "available" for applications in Private Spaces but not "installable" in a Private Space?

- A. The add-on always runs in the same Private Space as the provisioning application.
- B. The traffic between the provisioning app and the add-on will travel across the public Internet.
- C. The add-on will always run in the same region, but not in the same Private Space, as the provisioning application.
- D. The add-on's data will always be stored in the same Private Space as the provisioning application.

Correct Answer: C

QUESTION 10

Universal Containers has noticed that with every new product release there is a rise in customer reported Cases and a

decrease in first-time fix-rate.

Which two recommendations should a Consultant make? (Choose two.)

- A. Publish pre-release documentation on the Customer Community.
- B. Publish training documentation in a closed Chatter group.
- C. Increase training to Sales Representatives.
- D. Increase training to Field Service Technicians.

Correct Answer: AD

QUESTION 11

To satisfy the requirements of an upcoming compliance audit, a client must provide a record of all interactive commands run against a production application in the last six months. Which Heroku feature should an Architect recommend to help with this use case?

- A. Heroku Shield keystroke logging
- B. Dataclips
- C. Private Space Logging
- D. SSH tunneling using Heroku Exec

Correct Answer: A

<https://devcenter.heroku.com/articles/event-driven-microservices-with-apache-kafka>

QUESTION 12

Universal Containers (UC) is opening offices in Japan and Germany. This will allow them to serve new customers in Asia and in Europe. UC is concerned about application latency for their new customers, especially because the app serves large amounts of dynamic content.

Which Heroku Enterprise feature should an Architect recommend to alleviate this concern?

- A. Create Salesforce orgs in each region and use Heroku Connect to link them.
- B. Deploy instances of their applications into Private Spaces in Tokyo and Frankfurt.
- C. Deploy a globally-distributed CDN in front of the application.
- D. Create a Heroku Pipeline to mirror the app and its data in each region.

Correct Answer: A

**QUESTION 13**

A client's Heroku application is publishing messages to an instance of Apache Kafka on Heroku. What does a second Heroku application need to do to consume those messages?

- A. Subscribe to the Kafka partition(s) that the messages are being published to.
- B. Join a consumer group that also includes the publishing application.
- C. Subscribe to the Kafka topic(s) that the messages are being published to.
- D. Convert the publishing application into a stream processor.

Correct Answer: A

<https://www.xloudkarafka.com/blog/2016-11-30-part1-kafka-for-beginners-what-is-apache-kafka.html>

QUESTION 14

A client has a web application that persists data to a local JSON file. They are migrating the application to Heroku. In order for the application to conform to the Twelve-Factor methodology, what changes should an Architect recommend?

- A. The application should persist the data to a database add-on.
- B. The application should persist the data to a local SQLite database.
- C. The application should use at least 2 dynos to ensure that the JSON file is highly available.
- D. The application should be stateless and therefore not persist data at all.

Correct Answer: A

QUESTION 15

Universal Containers wants to ensure that inventory needed for repair jobs is tracked and managed so Technicians have the material for their jobs. Which two ways should a Consultant recommend tracking these inventory requirements in Salesforce? (Choose two.)

- A. Products Required for Work Orders
- B. Products Required for Service Appointments
- C. Products Required for Work Order Line Items
- D. Products Required for Service Resources

Correct Answer: AC
