-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Your customer has an HP MSA P2000 G3 with 48 x 600GB LFF SAS drives. The customer asks you for an upgrade path to the new HP MSA 2040 Storage.

What is the recommended upgrade path?

- A. Replace both controllers with HP MSA 2040 controllers and leverage data-in-place upgrades.
- B. Use HP Peer Motion data on the existing HP MSA P2000 G3 and tier it to a new MSA 2040.
- C. Purchase a new HP MSA 2040 and migrate data from the existing array.
- D. Repurpose existing disks and purchase a new chassis, IO Module, and controllers.

Correct Answer: B

---

**QUESTION 2**

What is the preferred tool for determining Adaptive Optimization (AO) expected performance?

- A. HP Storage Sizer
- B. NinjaThin
- C. HP 3PAR System Reporter
- D. NinjaStars

Correct Answer: C

---

**QUESTION 3**

Which advantage does an HP 3PAR StoreServ Storage System provide in an HP Virtual Connect FlexFabric environment?

- A. The Fibre Channel host ports are NPIV enabled.
- B. The VCEM can be used to configure the hosts on the storage system.
- C. The HP 3PAR StoreServ Storage Systems are FCoE ready.
- D. The Fibre Channel host ports can be attached directly to the FlexFabric modules.

Correct Answer: D

---

**QUESTION 4**

Which part of the HP Storage portfolio is described as a converged protocol storage system?

- A. HP StoreEasy
- B. HP 3PAR StoreServ
- C. HP StoreQnce
- D. HP StoreVirtual

Correct Answer: A

---

#### QUESTION 5

Which network port requires an Ethernet connection to use the HP Agentless Management feature on an HP storeVirtual 4330?

- A. Blade Onboard Administrator
- B. HP iLO management processor
- C. Onboard NIC1
- D. Integrity Management Processor

Correct Answer: B

---

#### QUESTION 6

Which advantage do 15k RPM drives provide over 10k drives?

- A. higher seek time
- B. higher duty cycle
- C. improved MTBF
- D. decreased rotational latency

Correct Answer: D

---

#### QUESTION 7

Which HP tool can be used to analyze all performance counters of the existing array?

- A. HP Performance Monitor
- B. HP EVAPerf
- C. Windows Perfmon
- D. HP 3PAR System Reporter

Correct Answer: D

---

### QUESTION 8

Which BYOD services are provided by HP Intelligent Management Center? (Select two)

- A. End user compression
- B. Storage federation
- C. Routing optimization
- D. Device compliance
- E. User authentication

Correct Answer: DE

---

### QUESTION 9

A medium-sized warehouse company IT environment has grown over time. They have recently virtualized their servers using VMware technologies. They need a management system based on HP servers and storage devices to gain control of their ever-growing IT infrastructure. They do not want to introduce and learn a new interface.

Which HP solution do you recommend to the customer?

- A. Insight Server for VMware vCenter Server
- B. Insight Server for VMware vCenter
- C. Insight control for VMware vCenter Server
- D. Insight control for VMware Server

Correct Answer: C

---

### QUESTION 10

You are asked to design a backup, recovery, and archive (BURA) solution for a customer. After the classification and categorization of the data, it is determined that legacy data will be stored on HP StoreAll and HP StoreEver, and operational data will be stored on HP StoreOnce.

What should you suggest for critical data storage that will enable the customer almost instantaneous restore in the event of failures?

- A. HP 3PAR StoreServ Recovery Manager
- B. HP StoreVirtual Application Integrated Snapshots
- C. HP MSA Remote Snap Software

D. HP Data Protector Catalyst

Correct Answer: B

---

#### QUESTION 11

Which HP 3PAR StorServ tool can be used to collect detailed server configuration information such as the OS type version, WWN of HBAs, the iSCSI name, and host multipathing information over a secure communication channel?

- A. System Reporter
- B. Web Services API
- C. Recovery Manager
- D. Host Explorer

Correct Answer: D

---

#### QUESTION 12

Scenario: The consultant is reviewing a customer's storage and backup infrastructure design for a possible upgrade new solution design. The existing environment consists of several HP DL servers connected to HP 24 SAN Switches. An HP Enterprise Virtual Array 4400 is used as storage for their virtualized servers. Some HP D2700 Storage Systems are direct connected to their Windows servers. An HP StoreOnce D2D 4106fc Backup System is used as primary backup target. Once a week backup data copied to an HP MSL4048 as secondary backup target using HP Data Protector (DP) 6.1, During the planning phase the consultant has to propose whether the existing solution can be upgraded or a new solution design is required.

Refer to the scenario:

Upgrading the backup application and the primary backup system to the latest software version would provide which advantage?

- A. Federated Deduplication can be implemented using HP StoreOnce Catalyst.
- B. A Media Agent can be installed on the HPStoreOnce Backup System using the HP DPStoreOnce client.
- C. Tape offload can be performed using direct-attached tape drives and the Data Protector echo copy functionality.
- D. The new HP Data Protector VTL license model can be applied.

Correct Answer: A

---

#### QUESTION 13

When planning a design for highly available storage clusters operating between multiple data centers, which factors protect against data center failures? (Select two.)

- A. passive backplanes in nodes

- B. redundant CMC implementation
- C. Network Raid 5
- D. site design and quorum managers
- E. data replication

Correct Answer: BE

---

#### QUESTION 14

What are characteristics of SSD drive technology? (Select two.)

- A. Any SSD will immediately lose data when power is removed.
- B. SSD drives are recommended for storage array-tiring strategies
- C. SSD drives compress data natively via the drive interface with an embedded controller.
- D. SSD drives provide faster write performance by eliminating the need for raid calculations
- E. SSD drives manage wear leveling via the drive interface board and embedded controller.

Correct Answer: AD

---

#### QUESTION 15

Which HP Storage solution provides automatically-optimized tiered storage and thin provisioning?

- A. HP MSA P2000
- B. HP EVA P6000
- C. HP StoreVirtual
- D. HP 3PAR StoreServ

Correct Answer: D
