QUESTION 2

A customer wishes to know if a particular USB scanner device will work with a t520 thin client running ThinPro, passing through to a VMware View/Horizon virtual machine. The USB device has not been tested by HP previously, and you do not have a VMware back-end to test with. What should you do?

- A. Promise the customer that the USB device will just work and that they do not need to worry.
- B. Have the customer ship you an extra USB device and test it yourself.
- C. Suggest that they purchase the higher-cost t520 with Windows Embedded 7 instead.
- D. Send the customer an appropriate demo t520 and have them test the USB device in a proof-of-concept.

Correct Answer: D

QUESTION 3

Once a customer has chosen an ISV for their client virtualization software, which question should you ask about that software to help choose a thin client model?

- A. If they plan to run any business productivity software on the thin clients
- B. If they plan to replace these thin clients within the next 3 years
- C. How many thin clients they need
- D. If they plan to use any redirection technologies such as HDX or RFX

Correct Answer: A
