QUESTION 1

Which statement best describes the licensing model used in HP ALM security solutions?

A. HP Software Security Center solutions use a "High-water mark of past use" license model where usage fees are calculated based on the maximum number of concurrent users in a defined past time period (typically monthly).

B. All HP Software Security Center solutions are server-based and use a concurrent user network licensing model.

C. HP Software Security Center solutions support a variety of flexible licensing options, including single "named" user, node-locked and concurrent "floating" user licenses, which are valid for a fixed period and annually renewable.

D. HP Software Security Center solutions use pay-per-use license fees and are based on actual usage.

Correct Answer: B

QUESTION 2

What are the value propositions that provide benefits to the personas (developers, functional testers, and performance testers) that would use HP Service Virtualization? (Select three.)

A. provide real-time visibility in rapid change

B. automate with universal event correlation
