D. Captive Portal Authentication

E. Open System Authentication

Correct Answer: A

Reference https://community.arubanetworks.com/t5/AAA-NAC-Guest-Access-BYOD/Binary-comparisonin-EAP-TLS-Authentication/ta-p/257857

QUESTION 3

Refer to the exhibit. Based on the information shown, what is the status of the network?

A. ClearPass can do TCP OS finger printing but Dictionary is not updated.

B. ClearPass cannot do TCP OS finger printing.

C. Device is Unknown to ClearPass.

D. Device is not authenticated.

E. ClearPass supports TCP finger printing but it is not enabled.

Correct Answer: E

QUESTION 4

Based on the self-registration customization, what is the expected outcome?

A. When the user connects to an Aruba NAD device, the user will be redirected to this self-registration page.

B. When the user completes the self-registration form, a NAS login request will be sent from the client to ClearPass alternate domain at securelogin.arubanetworks.com.

C. When the user browses to securelogin.arubanetworks.com, the user will be redirected to the self-registration page.

D. User credentials will be sent to the NAD device when the user clicks the login button on the self-registration receipt page.

E. When the user clicks the register button on the self-registration page, user credentials will be sent to the NAD.

Correct Answer: B

QUESTION 5

What is the purpose of a guest self-registration page in ClearPass?

A. to allow employees to get their own devices securely connected to the network

B. to allow contractors to create their own accounts in Active Directory

C. to allow employees\' sponsors to create accounts for their guests

D. to allow employees to easily get their corporate devices on the network

E. to allow guest users to create a login account for the web login page

Correct Answer: B

Guest self-registration allows an administrator to customize the process for guests to create their own visitor accounts. Self-registration is also referred to as self-provisioned access

QUESTION 6

What is the purpose of the pre-auth check during guest authentication?

A. for the NAD device to do an internal authentication check before sending the credentials to ClearPass

B. for the NAD device to check that ClearPass is active before sending it the RADIUS request

C. for ClearPass to do an internal authentication check before the NAS login happens

D. for the client device to do an internal sanity check before the NAS login occurs

E. for the client device to check that ClearPass is active before sending it the credentials

Correct Answer: C

The way NAS devices like wireless controllers do authentication on external captive portals only allows standard reject message handling like "authentication failed". The pre auth check allows CPPM to provide advanced error handling of a reject like "your time limit has been reached" before a user logs in. It is to do an end run around limited error handing of NAS devices on external captive portals.

QUESTION 7

Refer to the exhibit. A user has enabled `department\\' and `memberOf\\' as roles.

What is the direct effect of the user\\'s action?

A. The user\\'s authentication will be rejected if the user does not have an admin user group membership in AD.

B. The user\\'s memberOf attribute is sent back to the controller as a firewall role.

C. The user\\'s department and group membership will be seen in the Access tracker roles section.

D. The user\\'s authentication will be rejected if the user does not have a department attribute in AD.

E. The user\\'s department is sent back to the controller as a firewall role.

Correct Answer: A

QUESTION 8
