**QUESTION 1**

What are three reasons for using certificates? (Choose three.)

- A. for role mapping
- B. to acquire an IP address
- C. for server authentication
- D. for user authentication
- E. for ESP negotiation

Correct Answer: ACD

QUESTION 2

You want to restrict role access to only users who have the required client certificate and pass a Host Checker policy. Which two methods in the Admin UI would set this restriction? (Choose two.)

- A. Enable the Host Checker and certificate role restrictions.
- B. Require and enforce the Host Checker and certificate authentication policies.
- C. Use a custom expression to map users to the role based on the client certificate and Host Checker policy.
- D. Use Secure Virtual Workspace to restrict access to the role based on the client certificate and Host Checker policy.

Correct Answer: AC

QUESTION 3

What are three ways a Junos Pulse connection is initiated to a Junos Pulse Secure Access Service? (Choose three.)

- A. The connection is initiated when the Web browser requires that a VPN tunnel be established.
- B. The connection is initiated after the user signs in to the PC.
- C. The user manually initiates a connection.
- D. The connection is initiated after the PC starts.
- E. The connection is initiated only if application acceleration is enabled.

Correct Answer: BCD

**QUESTION 4**

Which two server instances would be used as secondary authentication servers on the Junos Pulse Secure Access Service? (Choose two.)

- A. RADIUS server
- B. anonymous server
- C. Active Directory server
- D. certificate server

Correct Answer: AC

QUESTION 5

A user is mapped to two roles. The first role assigned has a maximum session length of 240 minutes. The second role assigned has a maximum session length of 480 minutes. Which maximum session length in minutes will the user receive?

- A. 60
- B. 240
- C. 480
- D. 720

Correct Answer: C

QUESTION 6

A user must communicate with a server-initiated connection through the Junos Pulse Secure Access Service. Which access method must be available to the user for this to be accomplished?

- A. browser-based access
- B. Network Layer access
- C. Application Layer access
- D. core access

Correct Answer: B

**QUESTION 7**

You have just created a Host Checker policy that limits role access to only users who sign in with company-issued computers. All users who do not pass the policy will be remediated to a different role with fewer features. Which two steps in the Admin UI must you configure to enforce the policy? (Choose two.)

- A. For the Host Checker Authentication Policy, choose "Require and Enforce".
- B. For the Host Checker Authentication Policy, choose "Evaluate Policies".
- C. For the Host Checker Role Restriction, allow all users.
- D. For the Host Checker Role Restriction, allow only users who meet the selected Host Checker policy.

Correct Answer: BD

QUESTION 8

You are currently the administrator of a network which provisions secure remote access using the Junos Pulse Secure Access Service in an active/passive cluster. You want to upgrade both units in the cluster to Software Release 7.2. You want to ensure that secure remote access is maintained during the upgrade.

Which feature addresses this concern?

- A. Central Manager
- B. CL license
- C. IP address takeover (IPAT)
- D. virtual IP (VIP)

Correct Answer: A

QUESTION 9

Which sequence describes the processing order when a user authenticates to a Junos Pulse Secure Access Service?

- A. sign-in policies, roles, authentication realms, resource policies
- B. sign-in policies, authentication realms, resource policies, roles
- C. sign-in policies, resource policies, roles, authentication realms
- D. sign-in policies, authentication realms, roles, resource policies

Correct Answer: D

QUESTION 10

You are logged in to the Junos Pulse Secure Access Service on your laptop using the wired connection on your docking station. You undock your machine and move over to a wireless network and your session does not reconnect. Why did this happen?

- A. The browser request follow through was disabled.
- B. The roaming session was disabled.
- C. The persistent session was disabled.
- D. The enable session extension was disabled.

Correct Answer: B

QUESTION 11

You must create a self-signed certificate during an initial install. What information must you provide? (Choose two.)

- A. public key
- B. certificate signing request
- C. common name
- D. organization name

Correct Answer: CD

QUESTION 12

Which two parameters are defined by a user role that customizes the appearance of the start page? (Choose two.)

- A. file access
- B. sign-in page layout
- C. bookmarks
- D. bookmark layout

Correct Answer: CD

**QUESTION 13**

A user is currently not able to sign in to the Junos Pulse Secure Access Service. LDAP authentication is currently configured for all users. You run a TCP dump during the authentication attempt and notice that the response from the LDAP server lists resultCode. invalidCredentials (49).
