QUESTION 1

A global dashboard filter and the filter on a tile within that dashboard conflict because the global dashboard filter and the individual tile filter are based on the same field with different filter values.

What happens in this situation?

A. The filter values of both filters will combine in an additive manner and both filters will apply.

B. The individual tile\\'s filter will override the global dashboard filter.

C. The global dashboard filter will override the individual tile filter.

D. The dashboard will break and warn the user that there are conflicting filter values.

Correct Answer: C

QUESTION 2

A CEO wants to receive a daily email with the existing executive dashboard to review on a mobile device on the way to the office.

What should the analyst do to optimize the dashboard for mobile viewing?

A. Schedule the dashboard as HTML to adjust automatically.

B. Schedule the dashboard with the PDF format Use single column layout.

C. Create a mobile-friendly version of the dashboard by rearranging the tiles, and schedule the dashboard.

D. Schedule the dashboard with PDF paper size set to Fit Page to Dashboard.

Correct Answer: B

QUESTION 3

A business analyst is using the Totals check box in an Explore to get the sum of a column of values. The number that appears in the Total row is much higher than the analyst expects, and this number is not the sum of the values in the column.

What is a possible cause of this discrepancy?

A. There is a row limit applied.

B. There is a filter on a dimension.

C. There is a problem with the underlying LookML.

D. There is a column limit applied.

Correct Answer: D

QUESTION 4

A business analyst is filtering for this year\\'s data in an Explore. There is a requirement to show future dates for this year in the visualization, even though those dates do not yet have associated data.

Where should the analyst go to make sure dates are filled in for the future?

A. X-axis settings

B. Column settings

C. Explore settings

D. Row settings

Correct Answer: C

QUESTION 5

The analyst is exploring weekly sales revenue in the last 3 months using a line chart. One requirement is to show the sales target $30,000 in the chart.

Which solution can help the analyst display the sales target?

A. Add a trend line for 30000.

B. Add a Tick Density of 30000.

C. Add a reference line for 30000.

D. Add a table calculation to hide values less than 30000.

Correct Answer: A

QUESTION 6

An analyst pins a dashboard from a personal folder to the team board. Other colleagues report that they cannot access the dashboard. There are a few dashboards in the personal folder that are not ready to share yet.

What should the analyst do to enable the team\\'s access?

A. Give all users view access to the personal folder.

B. Move the dashboard to a shared folder and provide access only to the users from the team.

C. Give view access to the individual dashboards.

D. Create a subfolder in the personal folder and given view access to the users from the team.

Correct Answer: D

QUESTION 7

An analyst has created a line chart with Value Labels enabled, but the values are too long and need to be abbreviated.

Which visualization option should the analyst utilize to alter the display of the value labels?

A. Axis Value Labels

B. Value Format

C. Label Rotation

D. Time Label Format

Correct Answer: B

QUESTION 8

An analyst wants to schedule a dashboard in a way that makes it easier for viewing on a mobile device or for viewing a printout of the dashboard.

How can the analyst set up a schedule to accomplish this?

A. Check Use single column layout in the Advanced options section of the scheduler.

B. Check Expand tables in the Advanced options section of the scheduler.

C. Select the paper size Tabloid with orientation Landscape in the Advanced options section of the scheduler.

D. Select Run schedule as recipient in the Advanced options section of the scheduler, and edit the recipient\\'s user attribute preferences to be individual_images.

Correct Answer: A

QUESTION 9

An analyst creates a table visualization. There is one dimension, a few count type measures, and a percentage table calculation. When the analyst tries to download all 200,000 rows of results in CSV, the option is unavailable. The analyst has been provided permission to download all results.

Which action should the analyst take to download all results?

A. Request that the admin user download this Look and share the file.

B. Change the table calculation to use an offset() function.

C. Contact the developer to create the percentage as a measure.

D. Apply a custom limit to the download.

Correct Answer: D

QUESTION 10

Two users report seeing different results on the same dashboard.

Which three configurations could explain these discrepancies? (Choose three.)

A. The time zone setting is different for each user.

B. Looker caching is affecting results.

C. The dashboard uses separate Explores for each user.

D. Dashboard filters are being used

E. The dashboard was accessed via different boards.

Correct Answer: CDE
