QUESTION 5

You plan to create a field for an entity to capture data in a consistent format.

When a user adds a record for the entity, the choices provided to the user for the field often change or become outdated.

The choices must not be available for new records.

You need to create the field while minimizing the administrative overhead to maintain the field.

Which field type should you use?

- A. global option set
- B. single line of text
- C. local option set
- D. lookup

Correct Answer: C

QUESTION 6

You are implementing a new business process flow (BPF) in Microsoft Dynamics 365.

You specify a name and the primary intent for the BPF, and define the stages and conditions.

You need to configure the composition.

Which two options can you configure? Each correct answer presents a complete solution.

- A. Dialogs
- B. Workflows
- C. Steps
- D. Actions

Correct Answer: BC

QUESTION 7

You need to display data that is referenced by a lookup field on a form. Which option should you use?

- A. Quick Find View
- B. Associated View
- C. Quick View
- D. Public View

Correct Answer: C

QUESTION 9

What is the character limit for a Single Line of Text field?

- A. 1,000
- B. 2,000

C. 4,000

D. 10,000

Correct Answer: C

QUESTION 10

You create a custom entity. Records are created by users through the user interface, and through a backend integration.

You must combine two fields to populate a new field that will replace the name field on the entity.

You need to ensure that the new field displays a result immediately after a new record is saved.

What should you use?

A. a background workflow

B. JavaScript code on the record form

C. a form-scoped business rule

D. a calculated field

Correct Answer: A

QUESTION 11

You need to model a relationship between the account entity and the contact entity to track the advisory board members of accounts.

You need to use connections to model the relationship between the account and contact entities. What should you do?

A. Create a one-to-many (1:N) relationship between the account and contact entities, and then use two connection roles to represent each side of the new 1:N relationship.

B. Create a connection entity, and then use two connection roles to represent each entity in the relationship.

C. Use two connection roles to represent each side of the relationship.

D. Create a many-to-many (N:N) relationship between the account and contact entities, and then use two connection roles to represent each side of the new N:N relationship.

Correct Answer: C

QUESTION 12

You are designing a managed solution that will be deployed to another part of the business. Users may want to customize specific parts of the solution after the solution is installed. Which capability represents a managed property that users can configure?

- A. the ability to change the display name of a system entity
- B. the ability to reassign a system dashboard
- C. the ability to rename a web resource
- D. the ability to add forms to a custom entity

Correct Answer: D
