Vendor: Microsoft

Exam Code: MB3-527

Exam Name: GP 10.0 Installtion and Configuration

Version: Demo

Question No : 1

To troubleshoot a performance issue, the Physical Disk\% Disk Time counter is being monitored in System Monitor. What threshold is identified as a concern for this counter?

A. 70% or above
B. 90% or above
C. 100% or above
D. Depends on the manufacturer's specifications

Answer: B

Explanation:

Question No : 2

Which of the following are differences between using SQL Server Profiler and creating a Dexsql log? Choose the 2 that apply.

A. Activity for one workstation is recorded in the Dexsql log file. SQL Server Profiler records activity for a specific user or server.
B. ODBC messages and SQL statements are recorded in the Dexsql.log file. SQL Server Profiler only captures SQL statements.
C. ODBC messages are recorded in the Dexsql.log file.
SQL Server Profiler records ODBC messages and SQL statements.
D. Activity for a specific user or server is recorded in the Dexsql.log file. SQL Server Profiler records activity for a specific workstation.

Answer: A,B

Explanation:

Question No : 3

Microsoft SQL Server 2005 Express is installed and used together with Microsoft Dynamics GP. Which of the following items are limitations regarding the implementation? Choose the 2 that apply.

A. Maximum of three company databases

B. Maximum database size of 4 GB

C. Limit of 10 named users for Microsoft Dynamics GP

D. Limit of 10 concurrent users for Microsoft Dynamics GP

Answer: B,D

Explanation:

Question No : 4

Why is it recommended that database log files be stored on a RAID 1 array?

A. RAID 1 arrays use a parity stripe that allows data on a failed disk to be reconstructed from the information on the other disks.

B. RAID 1 arrays have a lower cost per megabyte.

C. RAID 1 arrays have faster writing capabilities that result in better write performance to the log files.

D. RAID 1 arrays have excellent read capabilities that result in better read performance of the log files.

Answer: C

Explanation:

Question No : 5

Microsoft Dynamics GP is installed in a new environment and Microsoft Dynamics GP Utilities is started. What is the first task that is performed?

A. The DYNAMICS database is initialized.

B. A company database is set up.

C. The sample company database is installed.

D. Security settings are specified.

Answer: A

Explanation:

Question No : 6

Three new Microsoft Dynamics GP users are created. When any one of them tries to log in, there are no companies available n the Company Login window. Which window is used to resolve this issue?

A. User Access Setup
B. User Setup
C. Security Role Setup
D. Company Setup

Answer: A
Explanation:

Question No : 7

What are the elements of security in Microsoft Dynamics GP?

A. Company Access, Window Access, Report Access
B. Operations, Tasks, Roles
C. Classes, Methods, Events
D. Roles, Classes, Companies

Answer: B
Explanation:

Question No : 8

Which of the following SQL Server components must be installed to install a basic instance of the Microsoft Dynamics GP application from CD1?

A. SQL Server Database Services and Analysis Services
B. SQL Server Database Services and Workstation Components
C. SQL Server Database Services and Reporting Services
D. SQL Server Database Services, Workstation Components, and Analysis Services

Answer: B

Explanation:

A posting process is sent from a client computer to a process server for completion. How does a user on a client computer monitor the progress of the process? Choose the 2 that apply.

A. Open the Process Monitor window on the client computer to view processes running on the local process server.
B. Configure the report destination to place Posting Journals, the generated output of the posting process, in a shared location for review.
C. Watch for a status message to appear on the client computer when processing is complete.
D. Review the Posting Journals that appear automatically on the client computer when processing is complete.

Answer: A,B
Explanation:

While posting a batch, errors are returned. In the Batch Recovery window, the status of the batch is listed as "Transaction Error- Edit Required". The batch is selected, and the Continue button is clicked. What happens as a result of this action?

A. The batch is deleted from the company.
B. The batch is posted and errors print on the posting journals.
C. The transaction errors are automatically corrected and the batch is posted.
D. The batch becomes available and transactions can be edited to resolve errors.

Answer: D
Explanation:

Question No : 11

Which of the following are required SQL collation methods for Microsoft Dynamics GP? Choose the 2 that apply.

A. SQL_Latin1_General_Cp1_CS_AS (Sort Order 51)
B. SQL_Latin1_General_CP1_CI_AS (Sort Order 52)
C. SQL_Latin1_General_Cp437_BIN (Sort Order 30)
D. Latin! _General_BIN (Sort Order 50)

Answer: B,D
Explanation:

Question No : 12

As the Microsoft Dynamics GP Administrator, a request is received to create a new company database. Where is this task completed?

A. SQL Server Management Studio
B. Microsoft Dynamics GP Utilities
C. The Company Setup window in the Microsoft Dynamics GP application
D. SQL Server Configuration Manager

Answer: B
Explanation:

Question No : 13

Distributed processing is being implemented in Microsoft Dynamics GP.

What are the requirements of the Process Server system? Choose the 2 that apply.

A. Each workstation must resolve TCP/IP host names.
B. Each process server must have a printer installed.
C. All Microsoft Dynamics GP client computers and process servers must use the same Reports die.
D. All Microsoft Dynamics GP client computers and process servers must have the same

ODBC data source name.

Answer: A,D

Explanation:

Question No : 14

Microsoft Dynamics GP is purchased with Business Ready Licensing. It is determined that the Inventory Control module is not going to be used. In the Microsoft Dynamics GP application, where can this feature be disabled?

A. Dynamics set file
B. Registration window
C. Edit Launch File window
D. Security Role Setup window

Answer: B

Explanation:

Question No : 15

When creating a client installation package, which of the following pieces of information can be specified? Choose the 2 that apply.

A. Sys Data path
B. Reports and forms dictionary paths
C. Service pack number
D. SQL Server name

Answer: B,D

Explanation:

Question No : 16

A client installation package includes the Microsoft Dynamics GP components, as well as which of the following additional components when the Setup.exe is used to pull the install to the computer? Choose the 2 that apply.

A. Microsoft SQL Server Native Client
B. NET Framework 2.0
C. MDAC
D. Available Microsoft Dynamics GP service packs

Answer: A,B

Explanation:

Question No : 17

A user receives an error when attempting to access information in Microsoft Dynamics GP. The sa user does not receive the error. What is a potential cause of the issue?

A. Application Code
B. Window modifications
C. Permissions
D. Data

Answer: C

Explanation:

Question No : 18

As the Administrator, a request is received to create a new company using as much default information as possible. What information can be added automatically to the new company by using Microsoft Dynamics GP Utilities? Choose the 2 that apply.

A. Users
B. Addresses
C. Chart of Accounts
D. Payment Terms

Answer: C,D

Explanation:

Question No : 19

The Server Administrator completes the installation of Microsoft Dynamics GP. Now, the Server Administrator must install the additional Fixed Asset Management feature. How is this accomplished? Choose the 2 that apply.

A. Start the installation wizard on CD1; select the existing instance of Microsoft Dynamics GP; and, install the additional feature.
B. In Control Panel, double-click Add/Remove Programs, and then select Microsoft Dynamics GP 10.0. Click Change to open the Program Maintenance window to add the new feature.
C. Start the installation wizard on CD1; create a new instance of Microsoft Dynamics GP; and, install the additional feature.
D. Start the New Application wizard in Component Services; select the existing instance of Microsoft Dynamics GP; and, install the additional feature.

Answer: A,B
Explanation:

Question No : 20

Which of the following database options should be set to True for performance optimization reasons on Microsoft Dynamics GP databases?

A. Auto Create Statistics, Auto Update Statistics
B. Auto Create Statistics, Auto Shrink
C. Auto Close, Auto Shrink, Auto Create Statistics, Auto Update Statistics
D. Auto Close, Auto Update Statistics

Answer: A
Explanation:

Question No : 21

The GPS_SQL_Error_Codes table is in the DYNAMICS database and is used to troubleshoot Microsoft Dynamics GP-generated error numbers. This table is accessed through the query capability in SQL Server Management Studio. The GPS_SQL_Error_Codes table lists descriptions for Microsoft Dynamics GP-generated error message codes and provides a starting point for problem solving. Which of the following error messages is further explained by referring to this table?

A. DBMS: 2511, Dynamics: 0
B. DBMS: 0, Dynamics: 20051
C. Get/Change First Operation on Table
D. Violation of Primary Key Constraint

Answer: B
Explanation:

Question No : 22

When using Report Scheduler, what type of path is recommended for reports be published to?

A. Local directory
B. Mapped Drive
C. UNC Path
D. Web site

Answer: C
Explanation:
