**QUESTION 1**

Universal Containers has decided that they will be using the bulk API to migrate the existing data into Salesforce as they will be importing a total of 80 million records. While planning for the data migration, what techniques should the Architect recommend to make sure the load go according to schedule? Choose 2 answers

- A. Pre-process data that the triggers and workflows can be deactivated.
- B. Perform a test load using a full Sandbox prior to the Production load.
- C. Perform loads over a weekend server resource availability.
- D. Leverage several workstations, loading different objects simultaneously.

Correct Answer: AB

---

**QUESTION 2**

Universal Containers is using the enterprise WSDL to integrate their financial system to salesforce, while reading y=the release notes for the upcoming salesforce release the architect discovers a new object will be added to the salesforce data model that would be beneficial for the financial system integration. What two actions should the architect take to ensure the new object will be available to the financial system integration? Choose 2 answers

- A. Download the latest enterprise WSDL that contains the new object definition to generate Web service stubs for the new Salesforce object.
- B. Download the latest partner WSDL that contains the new object definition to generate web services stubs for the new salesforce object
- C. Migrate to the partner WSDL to generate a generic sObject service stub that can be leveraged for existing and future Salesforce objects
- D. Migrate to the metadata API to download the new salesforce sObject definition into the financial system integration.

Correct Answer: AD

---

**QUESTION 3**

Universal Containers has a customer setup process that relies on external database to send customers welcome and registration emails. When a customer contacts Universal containers via phone they need to receive the welcome email shortly following the conversation with the UC representative. Universal containers representatives work exclusively in Salesforce and any new customer contacts are created in Salesforce by the representative. The external database exposes a SOAP API for integration with other applications. What Salesforce technology best fulfills this requirement?

- A. Write a nightly batch synchronization to send customer information to the external database.
- B. Write an outbound message to send customer Information to an ESB.
- C. Write an outbound message to send customer Information to the external database.
- D. Write a trigger with an @future method to send customer Information to the external database

Correct Answer: C

---

#### QUESTION 4

Universal Container needs to integrate Salesforce with several home-grown systems. These systems require custom code to be written in order to integrate with them, and the CIO argues that if custom code needs to be written, then there is no reason to invest in middleware. Which three considerations should an Architect bring up to the CIO? Choose 3 answers

- A. Performance
- B. Error Handling
- C. Bulkification
- D. Orchestration
- E. Logging

Correct Answer: BDE

---

#### QUESTION 5

Universal Containers is building a managed package to distribute on the AppExchange. As part of the solution they would like to include authentication information (username/password) inside of the package for web service calls made from the package Universal containers web services. A Salesforce security review has flagged this as a security violation and the architect must decide how best to protect these credentials. Which two methods should the architect consider in order to protect these credentials? Choose 2 answers

- A. Utilize named credentials to store the username/password of the web service end post.
- B. Utilize a custom object with an encrypted text field to store the username/password of the web service end point.
- C. Utilize protected custom settings to store the username/password of the web service end point.
- D. Store the username/password directly in the Apex class that will be obfuscated in the managed package.

Correct Answer: AC

---

#### QUESTION 6

Universal Containers is currently doing User Acceptance Testing for small changes in a Developer sandbox. Users are complaining that allow release to production, some functionality is broken and performance is often negatively impacted. What is causing these complaints?

- A. Users should be testing in a Partial Sandbox in order to replicate Production functionality and performance characteristics.
- B. Users should be testing in a Full Sandbox in order to replicate Production functionality and performance characteristics.

C. Users should be testing with data loaded into the Developer sandbox in order to replication Production functionality and performance, characteristics.

D. Users should be testing in a Developer Pro sandbox in order to replicate Production functionality and performance characteristics.

Correct Answer: B

---

#### QUESTION 7

When making an Apex callout, what approach should an Integration Architect recommend for securely transporting sensitive data from Salesforce over an unsecure network connection?

A. Base64 encode the data before performing the call out from Apex.

B. Encrypt the data with a shared key before performing the Apex callout.

C. Use platform Encryption to secure the data before transporting.

D. Salesforce automatically secures all data transmissions to external systems.

Correct Answer: A

---

#### QUESTION 8

What are two benefits of named credentials? Choose 2 answers

A. They simplify utilizing OAuth for Apex callouts.

B. They Secure integrations to Salesforce from other systems.

C. They enforce secure communication to external systems

D. They securely store credentials in a maintainable way.

Correct Answer: AD

---

#### QUESTION 9

What are the three capabilities of the Bulk API? Choose 3 answers A. process multiple batch jobs asynchronously

B. Process multiple batch jobs synchronously

C. Roll back all transactions within a batch of 10000 records

D. Monitor job status via the API.

E. Monitor job status via the Web UI.

Correct Answer: ADE

---

**QUESTION 10**

Universal containers is migrating to Salesforce from a legacy system with existing SMTP-based integrations. What Salesforce platform capability should an Integration Architect consider?

- A. Custom Apex class with webservice methods that implement the SMTP protocol.
- B. Custom InboundEmailHandler to process the messages.
- C. Lightning connect with an oData/SMTP interchange.
- D. Custom Apex batch job to check for SMTP messages.

Correct Answer: A

---

**QUESTION 11**

Universal Containers is building a mobile application that connects to Salesforce for reading and updating data. What is the appropriate authentication solution?

- A. Create a mobile Integration user ID whose credentials are stored within the mobile application code.
- B. Prompt for the mobile user's username and Password; utilize the OAuth Username-Password flow to obtain an OAuth token.
- C. Redirect to Salesforce via the User-agent OAuth flow to obtain an access token and refresh token.
- D. Prompt for the mobile user's username and password; utilize the Enterprise WSDL login() operation to obtain a session ID.

Correct Answer: C

---

**QUESTION 12**

What are two considerations to make when performing SOAP callouts from within Apex? Choose 2 answers

- A. SOAP callouts consume API limits.
- B. WSDL2Apex supports RPC-style SOAP callouts.
- C. WSDL2Apex can be used to generate stub code.
- D. SOAP callouts cannot occur after any DML statements.

Correct Answer: CD

---

**QUESTION 13**

Universal Containers is implementing Salesforce for the first time. As part of the implementation, approximately 10

Million contact records need to be migrated into the new environment. What tool should an architect recommend?

- A. Salesforce Data Loader
- B. Data Import Wizard
- C. Excel connector
- D. Salesforce Workbench

Correct Answer: A

#### QUESTION 14

What capability should an Integration Architect consider if there is a need to synchronize data changed in Salesforce to a 3rd party with a JSON-based API endpoint?

- A. Use an outbound Message with the record's data;
- B. Use lightning connect to save the data to an external object.
- C. Use an Apex class to perform the REST callout asynchronously.
- D. use the REST API with the content-Type headerset to "JSON."

Correct Answer: C

#### QUESTION 15

Universal containers has built an integration module to pull customer support tickets out of various systems and push them to salesforce as cases. The integration was implemented using Salesforce SOAP API with batch size 200, and the jobs are scheduled to run every 30 minutes to make sure a job completes before the next job starts. After going Live, they found that jobs are failing occasionally due to a "Max CPU time exceeded" error thrown from a trigger on the case. Reducing the batch size to 100 would resolve the issue, but the jobs would then take an average of 35 minutes to run. Which two options should be considered to resolve the issue and make sure a job completes before the next one starts? Choose 2 answers

- A. No change to API options, and move the trigger code into a future method.
- B. No change to API options, and move the trigger code into a Queueable apex
- C. Bulk API with serial option and batch size 100, and no code changes
- D. Bulk API with parallel option and batch size 100, and no code changes.

Correct Answer: AD
