QUESTION 1

A company uses Microsoft 365.

Employees frequently work from home. They must be able to access custom applications that are not installed on their personal laptops.

You need to identify a solution that meets the requirement.

Which solution should you choose?

- A. Microsoft Access
- B. Power Virtual Agent
- C. Microsoft Remote Assist
- D. Windows Virtual Desktop
- E. Microsoft Teams

Correct Answer: D

QUESTION 2

Your company has a Microsoft 365 subscription.

After a Microsoft 365 outage, the Service Health Dashboard indicates no issues with the service.

You check the Service Health Dashboard and observe that the service is healthy.

You then access the Post-Incident Review (PIR).

Which of the following is the maximum time, after an incident has been resolved, that you have to wait for a preliminary Post-Incident Review (PIR) to be delivered via your Service Health Dashboard?

- A. 12 hours.
- B. 24 hours.
- C. 48 hours.
- D. 5 business days.

Correct Answer: C

QUESTION 3

An organization uses Microsoft 365 Business to secure their data.

Many users install the organization's data on their personal tablets and phones.

You need to protect the organization's data stored on users' devices.

Which three features support device security? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Remotely wiping company data
- B. Enabling Advanced Threat Protection for users
- C. Disabling the device remotely
- D. Automatically deleting files after 90 days of inactivity
- E. Requiring users to have a PIN on their device

Correct Answer: ADE

You can manage many of the Microsoft 365 Business security features in the admin center, which gives you a simplified way to turn these features on or off. In the admin center, you can do the following:

1.

Set application management settings for Android or iOS devices.

2.

These settings include deleting files from an inactive device after a set period, encrypting work files, requiring that users set a PIN, and so on.

3.

Set application protection settings for Windows 10 devices.

4.

These settings can be applied to company data on both company-owned, or personally owned devices.

5.

Set device protection settings for Windows 10 devices.

6.

You can enable BitLocker encryption to help protect data in case a device is lost or stolen, and enable Windows Exploit Guard to provide advanced protection against ransomware.

7.

Remove company data from devices.

8.

You can remotely wipe company data if a device is lost, stolen, or an employee leaves your company.

9.

Reset Windows 10 devices to their factory settings. You can reset any Windows 10 devices that have device protection settings applied to them.

QUESTION 4

DRAG DROP

A company is evaluating Microsoft 365.

You need to identify features of Zero Trust.

Which features should you choose? To answer, drag the appropriate features to the correct capabilities. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Features	
	Adaptive Access
	Threat Protection
	Policy Optimization

Capability	Feature
Governance and compliance	
Forensics and response automation	

Correct Answer:

**Features**

Adaptive Access

Capability

Governance and compliance

Forensics and response automation

Feature

Policy Optimization

Threat Protection

QUESTION 5**HOTSPOT**

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
You can deploy Microsoft 365 Apps for enterprise from a local source by using Configuration Manager.	<input type="radio"/>	<input type="radio"/>
You can deploy Microsoft 365 Apps for enterprise from the cloud by using the Office Deployment Tool.	<input type="radio"/>	<input type="radio"/>
You can deploy Microsoft 365 Apps for enterprise from a local source by using the Office Deployment Tool.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
You can deploy Microsoft 365 Apps for enterprise from a local source by using Configuration Manager.	<input type="radio"/>	<input checked="" type="radio"/>
You can deploy Microsoft 365 Apps for enterprise from the cloud by using the Office Deployment Tool.	<input checked="" type="radio"/>	<input type="radio"/>
You can deploy Microsoft 365 Apps for enterprise from a local source by using the Office Deployment Tool.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

You can deploy Microsoft 365 Apps from a local source.

However, you use the Office Deployment Tool, not the Configuration Manager.

When you deploy Microsoft 365 Apps with Configuration Manager the Cloud, not a local source, is used.

Box 2: Yes

Deploy Microsoft 365 Apps from the cloud

Follow the steps below to deploy Microsoft 365 Apps to client computers from the Office Content Delivery Network (CDN) by using the Office Deployment Tool (ODT).

Step 1: Download the Office Deployment Tool

Step 2: Create a configuration file for the pilot group

Step 3: Create a configuration file for the broad group

Step 4: Deploy Office to the pilot group

Step 5: Deploy Office to the broad group

Box 3: Yes

You can deploy Microsoft 365 Apps from a local source.

However, you use the Office Deployment Tool, not the Configuration Manager.

Follow the steps in this article to deploy Microsoft 365 Apps to client computers from a shared folder on your network by using the Office Deployment Tool (ODT).

Step 1: Create shared folders for Office installation files

Step 2: Download the Office Deployment Tool

Step 3: Create a configuration file for the pilot group

Step 4: Create a configuration file for the broad group

Step 5: Download the Office installation package for the pilot group

Step 6: Download the Office installation package for the broad group

Step 7: Deploy Office to the pilot group

Step 8: Deploy Office to the broad group

Reference: <https://docs.microsoft.com/en-us/deployoffice/deploy-microsoft-365-apps-configuration-manager>

<https://docs.microsoft.com/en-us/deployoffice/deploy-microsoft-365-apps-local-source>

QUESTION 6

Your company makes use of Microsoft 365 in their environment.

You have been tasked with making sure that members of the Global Administrators group are protected. The feature you use should achieve this by making use of dynamic risk profiles.

Which of the following is a feature you should use?

- A. Mobile application protection policy.
- B. Device configuration policy.
- C. Microsoft Azure AD Privilege Identity Protection.
- D. Microsoft Azure AD Conditional Access.

Correct Answer: D

QUESTION 7

DRAG DROP

You are a Microsoft 365 administrator for a company.

You need to recommend an appropriate Microsoft Office 365 plan for a customer that minimizes costs.

Which subscription plans should you recommend? To answer, drag the appropriate plans to the correct features. Each plan may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

**Answer Area****Office 365 plans**

ProPlus
Enterprise E1
Enterprise E3
Enterprise E5

Office 365 feature

Local copy of Microsoft Outlook that connects to an Exchange Server instance.

Search and discovery with Delve.

eDiscovery with in-place, hold, and export

Advanced eDiscovery with in-place search, hold, export, and analytics.

Office 365 plan

Office 365 plan
Office 365 plan
Office 365 plan
Office 365 plan

Correct Answer:

Answer Area**Office 365 plans**

Office 365 feature
