100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Palo Alto Networks Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

In which type of cloud computing service does an organization own and control application data, but not the application?

- A. platform as a service
- B. computing as a service
- C. infrastructure as a service
- D. software as a service

Correct Answer: D

QUESTION 2

Which action must be taken prior to a successful ransomware attack to enable recovery from the attack?

- A. create a data snapshot on your IDS device
- B. back up all hosts that contain critical data
- C. update all firewall malware signatures
- D. limit external exposure of internal DNS resource records

Correct Answer: B

QUESTION 3

Which security component can detect command-and-control traffic sent from multiple endpoints within a corporate data center?

- A. stateless firewall
- B. next-generation firewall
- C. personal endpoint firewall
- D. port-based firewall

Correct Answer: B

QUESTION 4

Which network security architecture feature is designed to purposely expose some of an organization's services to untrusted networks?

- A. network zone
- B. security zone
- C. demilitarized zone
- D. military zone

Correct Answer: C

QUESTION 5

DRAG DROP

Match each option with the term it describes.

Select and Place:

on-demand, network access to off-premises shared computing resources	Drag answer here	Public cloud computing
enables applications to be configured, managed, and run on off-premises equipment	Drag answer here	virtualization
requires a choice between a bare-metal or hosted hypervisor	Drag answer here	
enabled multiple guest operating systems to run on a single on-premises server	Drag answer here	

Correct Answer:

on-demand, network access to off-premises shared computing resources	Public cloud computing	Public cloud computing
enables applications to be configured, managed, and run on off-premises equipment	Public cloud computing	virtualization
requires a choice between a bare-metal or hosted hypervisor	virtualization	
enabled multiple guest operating systems to run on a single on-premises server	virtualization	

QUESTION 6

Which security component should you configure to block viruses not seen and blocked by the perimeter firewall?

- A. strong endpoint passwords
- B. endpoint disk encryption
- C. endpoint antivirus software
- D. endpoint NIC ACLs

Correct Answer: C

QUESTION 7

What does Palo Alto Networks Traps do first when an endpoint is asked to run an executable?

- A. send the executable to WildFire
- B. run a static analysis
- C. run a dynamic analysis
- D. check its execution policy

Correct Answer: D

QUESTION 8

What is an example of a distance-vector routing protocol?

- A. OSPF
- B. BGP
- C. RIP D. IGRP

Correct Answer: C

QUESTION 9

Which option lists the correct sequence of a TCP three-way handshake?

- A. SYN, ACK, SYN
- B. SYN, SYN+ACK, ACK
- C. SYN, ACK, FIN
- D. SYN, SYN+ACK, FIN

Correct Answer: B

QUESTION 10

Which well-known port is associated with the Simple Mail Transfer Protocol?

- A. 143
- B. 25
- C. 997
- D. 40

Correct Answer: B

QUESTION 11

On an endpoint, which method should you use to secure applications against exploits?

- A. full-disk encryption
- B. strong user passwords
- C. software patches
- D. endpoint-based firewall

Correct Answer: D

QUESTION 12

What does a hypervisor enable?

- A. high-speed searching of already aggregated security log files
- B. high-speed aggregation and viewing of security log files
- C. multiple physical machines to be configured into a high-performance cluster
- D. multiple guest operating systems to run on a single physical machine

Correct Answer: D

QUESTION 13

When accessing an intranet website, a certificate error is received. What can be done to move past the certificate error and ensure that the error is not received the next time the website is accessed?

- A. install the website certificate into the web browser
- B. request trusted access from the web developer
- C. enable TLS 2.0 in the advanced options of the web browser
- D. trust the web developer for the application

Correct Answer: A

QUESTION 14

DRAG DROP

Match the OSI network model Layer 3 function to the correct description.

Select and Place:

routing	Drag answer here	provides service to direct packets to their destination host
encapsulation	Drag answer here	wraps transport layer data in IP packets
decapsulation	Drag answer here	provides segments or datagrams to the transport layer
addressing	Drag answer here	provides a mechanism for identifying end devices

Correct Answer:

routing	provides service to direct packets to their destination host	
encapsulation	wraps transport layer data in IP packets	
decapsulation	provides segments or datagrams to the transport layer	
addressing	provides a mechanism for identifying end devices	

QUESTION 15

Assume that it is your responsibility to secure the software functioning at all layers in the exhibit.

Which cloud service model type is represented?

- A. software as a service
- B. platform as a service
- C. infrastructure as a service
- D. on-premises

Correct Answer: D
