**QUESTION 1**

A moving company provides customers with a tool that recommends a moving vehicle based on the number of bedrooms in their current living space and whether they are planning to move heavy furniture like bed frames, mattresses, or couches. Based on the customer inputs, a decision table presents the customer with a recommendation.

Which two configurations do you use together to build the decision table? (Choose Two)

- A. Create a column for the recommended moving vehicle.
- B. Create rows for the recommended moving vehicle.
- C. Create two rows, one for the number of bedrooms and one for whether the customer is moving heavy furniture.
- D. Create two columns, one for the number of bedrooms and one for whether the customer is moving heavy furniture.

Correct Answer: AD

---

**QUESTION 2**

Employees submit time-off requests that must be approved by their manager. If the requested time off is extended beyond three weeks, the manager, director, and a member of human resources (HR) must approve the request.

Which two configurations, when applied in combination, achieve this behavior? (Choose Two)

- A. Create a decision table and evaluate all rows.
- B. Use a cascading approval with an authority matrix.
- C. Use a cascading approval with a reporting structure.
- D. Configure custom approvals in the reporting structure.

Correct Answer: AB

---

**QUESTION 3**

Select each Application Design Requirement on the left and drag it to the appropriate Design Approach on the right

Application design requirement

1.

Display only relevant fields for a given task

2.

Help the user perform an expected task

3.

Record the justification for an action taken on case

4.

Alert the user of a pending assignment

a.

Assignment Instruction

b.

Intent Driver UI

c.

Assignment Notification

d.

Audit Note

A.

1-b,2-a,3-d,4-c

B.

1-a,2-b,3-d,4-c

C.

1-b,2-c,3-d,4-a

D.

1-c,2-d,3-b,4-a

Correct Answer: D

---

#### QUESTION 4

An online sales application supports both laptop and mobile devices. You are configuring the application skin and you notice the responsive layout in the mobile device is not displaying views as stakeholders require. Which two options allow you to resolve this situation without negatively impacting the laptop users? (Choose two.)

- A. Use the same application skin in all portals.
- B. Update the process to give mobile users a separate portal.
- C. Do not use a skin for the mobile application version.
- D. Adjust the responsive behavior in the skin for optimal viewing in the mobile portal.

Correct Answer: AC

---

#### QUESTION 5

Which two conditions do you test with a unit test? (Choose Two)

- A. A data page populates without any errors.
- B. A property value is set correctly by a data transform.
- C. An application displays user views for 20 users within three seconds.
- D. An application is successfully migrated to a test system.

Correct Answer: AB

---

#### QUESTION 6

Which source do you select for a data page that contains the details of single record for a data type?

- A. Report definition
- B. Data transform
- C. Connector
- D. Lookup

Correct Answer: D

---

#### QUESTION 7

DRAG DROP

Match each use case to the appropriate configuration.

Select and Place:

**Use case**

Item quantity and pricing must be captured at the time an order is placed and do not update when the case is accessed later.

Customers must see all of the available mortgage options, but only the selected option is recorded as a part of the case.

Flight status and information remain current each time a customer accesses their reservation.

**Answer Area****Use case****Configuration**

Configure a property to refer to a data page

Configure a property to copy data from a data page

Configure a UI control to source data from a data page

Correct Answer:

**Use case**  
  
**Answer Area****Use case**

Flight status and information remain current each time a customer accesses their reservation.

Item quantity and pricing must be captured at the time an order is placed and do not update when the case is accessed later.

Customers must see all of the available mortgage options, but only the selected option is recorded as a part of the case.

**Configuration**

Configure a property to refer to a data page

Configure a property to copy data from a data page

Configure a UI control to source data from a data page

**QUESTION 8**

You are developing a case type to process visa applications. As part of the process, applicants need to schedule an interview with the consulate. A child Interview case is created for the interview process and assessment. Following the interview, it typically takes 48 hours for the consulate to reach a decision. For the visa case to proceed to applicant notification, the Interview case needs to be resolved.

How do you configure a case type to achieve the required behavior?

- A. Add a Create Case step that creates the Interview child case. Following this step, add a Wait step that pauses the parent case until the Interview case reaches a status of Resolved and after 48 hours have elapsed.
- B. Add a Create Case step that creates the Interview child case. Following this step, add a Wait step that pauses the parent case until 48 hours have elapsed.
- C. Add a Create Case step that creates the Interview child case. Following this step, add a Wait step that pauses the parent case until the Interview case reaches a status of Resolved.
- D. Add a Create Case step that creates the Interview child case. There is no need to add a Wait step.

Correct Answer: B

---

#### QUESTION 9

A disrupted transaction case records account information using a page property. Account information is recorded at the time the case is created and does not update when the case is further processed. Account information is stored in an external system and accessed by a data page.

How do you configure the account information page?

- A. Select refer to a data page on the page property
- B. Configure the page property to refer to a keyed data page
- C. Define a reference property that refers to the data page
- D. Select copy from a data page on the page property

Correct Answer: D

---

#### QUESTION 10

A library application used by staff creates a book request case when a member wishes to borrow one or more books. As part of the case process, the application shows the staff a readonly list of outstanding past-due books to remind the member to return late books, select the Data page definition for this use case.

- A. List, Readonly, Thread
- B. Page, Editable, Node
- C. Page, Readonly, Requester
- D. List, Readonly, Requestor
- E. Page, Editable, Requester
- F. List, Readonly, Node

Correct Answer: D

---

#### QUESTION 11

How do you route an assignment so that any available member of the department can perform the task?

- A. Route the assignment to a work list.
- B. Route the assignment to the admin user
- C. Route the assignment separately to all members.
- D. Route the assignment to a work queue.

Correct Answer: D

---

### QUESTION 12

A hotel booking application allows customers to change rooms after making a reservation. Each room's status in each hotel is stored on a data page sourced from an external database table.

Which two configuration options, when applied in combination, do you use to update the database table when a customer changes rooms? (Choose Two)

- A. A savable data page that contains the room information
- B. A when rule to trigger the database update
- C. A data transform to copy updates to the data page
- D. An editable data page that contains the room information

Correct Answer: AC

---

### QUESTION 13

You are developing a Visa case type to process entry visa applications. As part of the process, applicants schedule an interview with the consulate. An Interview child case is created for the interview process. Following the interview, the consulate reaches a decision within 48 hours or more. For Visa case to proceed to application notification, the Interview case needs to be resolved.

After you create the Interview child case, how do you configure the case type to achieve the required behavior?

- A. Following the Create Case step, add a Wait step that pauses the parent case until the application schedules the interview.
- B. Following the Create Case step, add a Wait step that pauses the parent case until the Interview reaches the Resolved status.
- C. Following the Create Case step, add a services-level agreement (SLA) that escalates the parent case after 48 hours.
- D. Following the Create Case step, add an Interview step that is automatically resolved after 48 hours.

Correct Answer: B

---

### QUESTION 14

In a banking application, which two options must be used together to present users with a set of balance transfer options only if they elect to transfer a balance to their credit card? (Choose two)

- A. Add an action set on the layout containing the balance transfer offers to trigger a refresh
- B. Add a visible when condition on the check box for the balance transfer election

- C. Add an action set on the check box for the balance transfer election to trigger a refresh
- D. Add a visible when condition on the layout containing the balance transfer offers

Correct Answer: CD

---

#### QUESTION 15

To qualify for an instant loan, an applicant must earn a monthly income of at least GBP2000 and cannot exceed GBP20000 in total liability. How do you enforce these restrictions when requesting an instant loan?

- A. Use a Validate rule to call two Edit validate rules: one for income and one for liability.
- B. Use two Edit Validate rules: one for income and one for liability.
- C. Use a single Validate rule with two conditions: one for income and one for liability.
- D. Use UI controls to validate the entries in the income and liability fields.

Correct Answer: C
