- System returns a response

Service Steps Order

- 1
- 2
- 3
- 4
- 5

Correct Answer:

Service Steps Order

-
-
-
-
-

Service Steps Order

- 1 Request processing
- 2 Map inbound data
- 3 Inbound request received
- 4 Map outbound data
- 5 System returns a response

QUESTION 3

You are analyzing application performance and identify a data transform exceeding preferred performance parameters. Which performance tool do you use to help troubleshoot the issue?

- A. Performance Profiler
- B. Database Trace
- C. Performance Analyzer (PAL)
- D. Tracer

Correct Answer: A

QUESTION 4

What are three valid ways to exchange data through a Pega Web Mashup? (Choose Three)

- A. Use an action object configured as a script to perform additional actions on a web mashup gadget.
- B. Use the Javascript function doAction() to set or read data values through the hosting web page.
- C. Use an SQL call to exchange data between the mashup and hosting web page.
- D. Use a queue processor to pass updated attributes to the gadget on the hosting web page.
- E. Use the data-pega-event-onpagedata attribute to configure the default value for the gadget.

Correct Answer: ABE

QUESTION 5

A requirement states that the Manager role cannot open a purchase request during the Audit stage. How do you configure the case stage to satisfy this requirement?

- A. Apply an Access Deny record.
- B. Apply an Access When record.
- C. Apply a When record.
- D. Apply a Privilege record.

Correct Answer: B

QUESTION 6

A developer has identified resource-intensive queue processors as the source of performance issues that application users are experiencing.

Which two actions do you perform to resolve the performance issues? (Choose Two) A. Associate the queue processors with the appropriate node types.

B. Select the Include in background processing option on the application rule.

C. Configure the queue processors to run multiple times a day.

D. Configure the application nodes with node types.

Correct Answer: AD

QUESTION 7

Which two requirements are supported by Attribute-based access control (ABAC)? (Choose Two)

A. Managers can reschedule but not delete appointments.

B. Personal identifying information in the Work-Baking- class is restricted.

C. Agents assigned the "Top Secret" clearance level can delete reports.

D. Bakers with a rating of 4 or better can add recipes to the database.

Correct Answer: AB

QUESTION 8

Which two use cases correctly describe controlling access to an attachment category? (Choose Two)

A. Configure the When condition "IsCurrentStageTesting" to allow users to view an attachment if the rule returns true.

B. Configure a Visible when condition called "IsDocumentPrivate" to allow users to view an attachment if the rule returns false.

C. Configure the privilege "DeleteOwn" and assign it to a user so that a user can delete their own attachments.

D. Configure Client-based access control on the class where the attachment category exists to restrict access to the attachment.

Correct Answer: AC

QUESTION 9

You are preparing to create a new major version of an application ruleset in which there are multiple minor and patch versions. How do you create the new ruleset version?

A. Use the Ruleset Maintenance wizard to skim the relevant ruleset versions to copy the highest version of existing rules to the new ruleset version.

B. Use the Ruleset Maintenance wizard to merge the existing rules in the relevant ruleset versions to the new version.

C. Use the Application Structure landing page to lock and roll the existing ruleset versions to the new version.

D. Create a new application ruleset using the appropriate version number, then copy the highest version of existing rules into the new ruleset version.

Correct Answer: A

QUESTION 10

An application includes the following set of circumstanced instances of a decision table.

Class	Ruleset	Version	Circumstance
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-01	None
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Silver"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Gold"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-15	.Status="Platinum"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-15	.Status="Silver"

You update the application and increment the AccountManage ruleset version to 01-02-01. As part of this update, the circumstance .Status="Silver" is no longer needed by the application.

How do you implement this change?

- A. Create a new version of the circumstanced decision table in AccountManage:01-02-01 and select the Base rule option.
- B. Create a new version of the circumstanced decision table in AccountManage:01-02-01 and set the availability of the rule to Withdrawn.
- C. Create a new version of the circumstanced decision table in AccountManage:01-02-01 and set the availability of the rule to Blocked.
- D. Do nothing. Rule resolution does not consider rules in a lower minor version of a ruleset.

Correct Answer: C

QUESTION 11

Consider the following requirement: An auditing policy explicitly requires that employees cannot see the contents of complaints made against themselves.

Which security solution do you use to satisfy the requirement?

- A. Access of Role to Object
- B. Access Control Policy
- C. Access When

D. Access Deny

Correct Answer: A

QUESTION 12

A class group is used to _____.

- A. identify a layer of the Enterprise Class Structure
- B. combine related properties by usage
- C. assign work to a specific group of users
- D. associate child classes with a single database table

Correct Answer: A

QUESTION 13

What are the two most common ways to expose your application to an external system? (Choose Two)

- A. Create a connector linked to a data page.
- B. Leverage the Pega API.
- C. Configure a signed certificate.
- D. Create a web service with the Service wizard.

Correct Answer: BD

QUESTION 14

You should consider using a field value when the list of allowed values is

- A. mostly static
- B. three or fewer items
- C. specific to one case type
- D. shared across all case types

Correct Answer: C

QUESTION 15

You want to create a new minor version of an application ruleset to add a new feature to your application. The new

feature will be made available to users in a phased rollout.

How do you update the application to add the new ruleset version?

- A. Create a branch ruleset and a new application, and add the branch ruleset to the application.
- B. Lock and roll the existing ruleset, and create a new application version.
- C. Lock and roll the existing ruleset, and update the existing application version.
- D. Create a new application version and add the new ruleset version as a production ruleset.

Correct Answer: C
