QUESTION 1

A business analyst working on a project has identified:

3 requirements for which there is a workaround and the users can live without;

2 requirements that the users can live without for now;

15 requirements which, if not delivered, will make the solution unworkable or useless.

When these requirements are prioritized using MoSCoW, which of the following categories will not be used?

A. M

B. S

C. C

D. W

Correct Answer: D

QUESTION 2

Below are statements about what a use case model can help the analyst to do:

A) Establish the scope of a project.

B) Identify functional requirements.

C) Understand how data sets are related to each other.

D) Define the business rules in a process.

E) Validate how complete a requirements set is.

Which of these statements are true?

A. A, B and E

B. A, C and D

C. A, D and E

D. Define the business rules in a process.

E. B, C and E

Correct Answer: A

**QUESTION 3**

In developing requirements, a business analyst has decomposed requirements to reflect defined goals, which will deliver some benefit to the customer: the sales manager of Street-Runner Ltd.

The requirements may mostly be achieved in short periods of project effort (2 to 5 weeks), although some rework and change may be required.

What is the format of these requirements?

- A. Business activity models
- B. Process models
- C. Use cases
- D. User stories

Correct Answer: D

QUESTION 4

An automated software tool is being used to manage requirements, including changes to those requirements.

What information in a data catalogue is mandatory if requirements are to be managed using such a tool?

- A. Acceptance criteria
- B. Owner
- C. Priority
- D. RequirementID

Correct Answer: D

QUESTION 5

A project aims to deliver a means of enabling the inhabitants of an archipelago to vote via the Internet. Although the technology exists to provide Internet coverage for the islands, it is notoriously difficult (and therefore expensive) to provide robust coverage because of the remote location.

Two of the requirements captured from stakeholders are provided below:

1.
The solution shall provide all inhabitants with the ability to register and vote for a presidential candidate.
2.
All voters shall receive an email confirmation that their vote has been registered within 2 minutes of voting.

Which requirements filter will be particularly relevant in requirements analysis?

- A. Checking for solutions
- B. Confirming relevance
- C. Feasibility evaluation
- D. Removing conflicts

Correct Answer: C

QUESTION 6

An inexperienced business analyst has been asked to conduct scenario analysis. The notes he made about the topic during his training course are rather disorganized, with correct and incorrect assumptions grouped together.

Which of the following notes he made about scenario analysis is incorrect?

- A. A workshop discovery technique
- B. Can form the basis of test scripts
- C. Explicitly considers exception situations
- D. Helps to capture tacit knowledge

Correct Answer: B

QUESTION 7

A business analyst has been asked to ensure that all requirements are robust.

The following are potential characteristics of a requirement: A) Consistent B) Functional C) Tacit D) Technical E) Owned F) Relevant

Which of them are characteristics of a requirement that is robust?

- A. A, B and D
- B. A, E and F
- C. B, C and D
- D. C, E and F

Correct Answer: C

QUESTION 8

Poppy Pet Care Kennels offers short-term accommodation for dogs whilst their owners are on holiday. The managing director of the company has initiated a project to create a new website that will allow owners to view kennel availability, book kennel accommodation and allow them to monitor their dogs whilst they are away, via a webcam.

The system will also allow kennel assistants to plan the dogs\' feeding times and schedule kennel maintenance.

Customers will be able to leave feedback on the website, which will be reviewed by the quality manager who may respond to comments made by the customer.

The following are potential actors: A) Poppy Pet Care Kennels B) Kennel assistants C) The managing director D) Customers E) Quality manager

Which of these would be drawn as actors on the use case diagram?

A. A, B and C

B. A, D and E

C. B, C and E

D. B, D and E

Correct Answer: C

QUESTION 9

A project manager has stated that he wants \'secure and controlled access to documentation, as well as support for impact analysis and traceability in terms of version history\'.

What element of requirements management will offer this?

A. Change control

B. Configuration control

C. Configuration management

D. Software support

Correct Answer: A

QUESTION 10

A business analyst has interviewed project stakeholders and has a robust list of requirements.

At which stages in the requirements engineering framework would he check that these requirements support the business objectives defined at the start of the project?

A. Analysis and validation

B. Elicitation and analysis

C. Elicitation and documentation

D. Validation and documentation

Correct Answer: B
