

**Exam : ST0-029**

**Title : Symantec Endpoint Protection 11 (STS)**

**Version : Demo**

www.Pass4itSure.com

1. Which Symantec Network Access Control method supports basic and transparent mode for 802.1x?

- A. Gateway Enforcer
- B. Self Enforcement
- C. DHCP Enforcer D.
- LAN Enforcer

**Answer: D**

2. When using the Push Deployment wizard, which two methods can you use to identify the target machines to which you want to install the Symantec Endpoint Protection client? (Select two.)

- A. browse through Windows Networking
- B. import a file containing IP addresses
- C. specify a UNC path
- D. import a file containing MAC addresses
- E. import hostnames from an LDAP server

**Answer: AC**

3. From where does the Migration and Deployment wizard collect settings?

- A. configuration file
- B. Symantec Client Firewall Administrator
- C. Symantec AntiVirus server
- D. Active Directory server

**Answer: C**

4. In which group can you NOT create new subgroups?

- A. Global
- B. Subgroup
- C. Temporary
- D. Administrator-created

**Answer: C**

5. Which four events trigger an Auto-Protect scan? (Select four.)

- A. create
- B. open
- C. archive
- D. move
- E. rename
- F. run

**Answer:** ACDF

6. Upon which convention are custom Symantec Endpoint Protection Intrusion Prevention signatures based?

- A. Generic Exploit Blocking
- B. Cisco IDS
- C. SNORT
- D. Tripwire

**Answer:** C

7. Symantec released a new version of Symantec Endpoint Protection client software. An administrator needs to find out what versions of Symantec Endpoint Protection are currently in the network.

Which report provides this information?

- A. Application and Device Control Report
- B. System Report
- C. Compliance Report
- D. Computer Status Report

**Answer:** D

8. Where can you determine what content updates are available on the Symantec Endpoint Protection Manager?

- A. Home page
- B. Monitors page

- C. Clients page
- D. Admin page

**Answer: D**

9. How does Symantec Endpoint Protection use Unmanaged Detector to find unmanaged devices on the network?

- A. It compares MAC addresses to a list of known hosts.
- B. It receives logon failures notifications from an LDAP server.
- C. It pings clients on port 80 to trigger a response from managed clients.
- D. It attempts to make http connections with clients in an address range.

**Answer: A**

10. What are three features of Symantec Endpoint Protection 11.0? (Select three.)

- A. Application Performance Management
- B. Client Firewall
- C. Application and Device Control
- D. Endpoint Change Control
- E. Intrusion Prevention

**Answer: BCE**

11. How many client installation packages are required to install Symantec Endpoint Protection 11.0 with all available components?

- A. one B.
- two C.
- three D.
- four

**Answer: A**

12. What is a benefit of Symantec Endpoint Protection 11.0?

- A. A single client provides all functions, which reduces the resource usage footprint.

- B. Solaris is a supported platform for the client.
- C. The number of required management consoles is reduced from five to three, which simplifies administration compared to previous versions.
- D. Proactive Threat Protection runs in real-time.

**Answer: A**

13. Which two roles can Symantec Endpoint Protection Manager assign to managed clients? (Select two.)

- A. LAN Enforcer
- B. Group Update Provider
- C. Unmanaged Detector D.
- Database Replicator

**Answer: BC**

14. Which two statements describe the interactions between Symantec Endpoint Protection 11.0 and Quarantine Server? (Select two.)

- A. Clients upload log data and quarantined files to Symantec Endpoint Protection Manager, which forwards the files to the Quarantine Server.
- B. Clients upload log data to Symantec Endpoint Protection Manager and upload quarantined files to Quarantine Server.
- C. Clients upload log data and quarantined files to the Quarantine Server, which forwards the log data to the Symantec Endpoint Protection Manager.
- D. Symantec Endpoint Protection Manager sends quarantine policies, which define the location of the Quarantine Server, to managed clients.
- E. The Quarantine Server sends its location and quarantine policies and rules to all clients.

**Answer: BD**

15. Which parameter is unique to each Symantec Endpoint Protection client?

- A. CUID
- B. GUID
- C. SUID

D. RUID

**Answer: B**

16. Which two are characteristics of Proactive Threat Protection? (Select two.)

- A. detects unknown threats
- B. inspects encrypted network traffic
- C. evaluates process behavior
- D. blocks attacker's IP address

**Answer: AC**

17. Which two high-level components make up the Symantec Endpoint Protection solution? (Select two.)

- A. Symantec Endpoint Protection
- B. Symantec Critical System Protection
- C. Symantec Security Information Manager
- D. Symantec Network Access Control

**Answer: AD**

18. Which two do you need in order to add a Replication Partner? (Select two.)

- A. local domain user and password
- B. administrator name and password
- C. local domain administrator name and password
- D. replication server name and port

**Answer: BD**

19. Which failover option is available in Symantec Endpoint Protection?

- A. One manager can fail over between two databases in a single site.
- B. One client can fail over between two managers in a single site.
- C. One manager can fail over to another Group Update Provider.
- D. One client can fail over between two databases in separate sites.

**Answer: B**

20. What is the relationship of Symantec Network Access Control to Symantec Endpoint Protection 11.0?

- A. Symantec Network Access Control is completely integrated with Symantec Endpoint Protection 11.0 and cannot be installed alone.
- B. Symantec Network Access Control is a part of Symantec Endpoint Protection 11.0, but is not enabled unless a separate license is purchased.
- C. Symantec Network Access Control is not part of Symantec Endpoint Protection 11.0, but does not interfere with Symantec Endpoint Protection 11.0 components.
- D. Symantec Network Access Control works with Symantec Endpoint Protection 11.0, but uses a different management console and installation process.

**Answer: B**

21. How do requirements for installing Symantec Network Access Control relate to installing various components of Symantec Endpoint Protection 11.0?

- A. It does NOT install on any host that is used as either the Symantec Endpoint Protection Manager or a Group Update Provider.
- B. It installs in the same client package as all of the Symantec Endpoint Protection 11.0 components.
- C. It does NOT install on any client unless Symantec Endpoint Protection 11.0 is installed.
- D. It installs and is automatically enabled when the Network Threat Protection component of Symantec Endpoint Protection 11.0 is installed on any client.

**Answer: B**

22. Which two statements are true about Symantec Network Access Control? (Select two.)

- A. It is integrated into Symantec Endpoint Protection 11.0, with a shared management console and a single shared client.
- B. It is partially integrated into Symantec Endpoint Protection 11.0, with a shared management console and compatible clients.
- C. It is integrated into and included with Symantec Endpoint Protection 11.0, but requires an additional license to enable the network access control features.
- D. It is on the roadmap to be integrated with Symantec Endpoint Protection 11.0 in a future maintenance

pack release.

E. It is not integrated with Symantec Endpoint Protection 11.0, although both clients may be installed on any supported host without any operational issues.

**Answer:** AC

23. Which statement is true about Symantec Network Access Control 11.0 client administration?

- A. The administration console for Symantec Network Access Control 11.0 has been updated to resemble the Symantec Endpoint Protection Manager console.
- B. Symantec Network Access Control 11.0 centralized administration is now provided exclusively through the Symantec Endpoint Protection Manager console.
- C. The administration console for Symantec Network Access Control 11.0 now includes fields and options that require that Network Threat protection is enabled.
- D. Symantec Network Access Control 11.0 can now be administered through either its own console or the Symantec Endpoint Protection Manager console.

**Answer:** B

24. A company is interested in making sure that their remote VPN users have compliant systems before joining the corporate network.

Which two Symantec Network Access Control methods are recommended? (Select two.)

- A. LAN Enforcer
- B. Gateway Enforcer
- C. Self Enforcement
- D. DHCP Enforcer

**Answer:** BC

25. Which Symantec Network Access Control Enforcer can be deployed as either a software plug-in or as an appliance?

- A. LAN Enforcer
- B. Gateway Enforcer
- C. Self Enforcement

D. DHCP Enforcer

**Answer: D**

26. On which two operating systems can you install Symantec Endpoint Protection Manager? (Select two.)

- A. Microsoft Windows Vista Ultimate
- B. Microsoft Windows NT Server
- C. Microsoft Windows XP Professional
- D. Microsoft Windows Server 2003

**Answer: CD**

27. What is the maximum number of clients that a single Symantec Endpoint Protection Manager can support?

- A. 25,000
- B. 50,000
- C. 75,000
- D. 100,000

**Answer: B**

28. Which component must be installed prior to installing Symantec Endpoint Protection Manager?

- A. Apache Tomcat Server
- B. Microsoft Internet Authentication Server (IAS)
- C. Microsoft Internet Information Server (IIS)
- D. Sun Java Runtime Environment (JRE)

**Answer: C**

29. What is the maximum number of clients that the embedded database can support?

- A. 1,000
- B. 2,000
- C. 3,000

D. 5,000

**Answer: A**

30. Which two external databases does Symantec Endpoint Protection Manager support? (Select two.)

A. Microsoft SQL Server 2000

B. MySQL Server 2005

C. Microsoft SQL Server 2005

D. Oracle Database 11g

**Answer: AC**
