A backup is about to run, which is being sent to the "servers" volume pool, with a retention level of 1. The following host properties have also been enabled: allow multiple retentions per media allow backups to span tape media allow media

overwrite:

ANSI,

CPIO,

DBR

Which other tape would Symantec NetBackup 7.0 use for the backup, if tape T00306 becomes unavailable?

A. T00301

B. T00303

C. T00305

D. T00308

E. T00309

Correct Answer: C

---

#### QUESTION 12

If frequency-based cleaning of a drive is desired, which parameter must be set in the Symantec NetBackup 7.0 administration console?

A. Cleaning Frequency (Between mounts)

B. Cleaning Frequency (In GB)

C. Cleaning Frequency (Between backups)

D. Cleaning Frequency (In hours)

Correct Answer: D

---

#### QUESTION 13

An administrator has created three BasicDisk storage units within the NetBackup Administration Console (STU-A, STU-B, and STU-C). The administrator needs to create a backup policy that evenly rotates use of each of these storage units during backup. How can the policies or storage units be set up to accomplish this?

A. set up each of the policies to use "Any Available" storage unit

B. set up a storage unit group for these STUs and select "Failover" option for storage unit selection

C. set up a storage unit group for these STUs and select "Least recently selected storage unit" option

D. set up a storage unit group for these STUs and select "Choose storage units based on order specified above" option

Correct Answer: C

---

**QUESTION 14**

The Symantec Netbackup 7.0 master server has had an unrecoverable catastrophe. The administrator rebuilt another server with the same hostname and attached all the necessary hardware. The administrator has reinstalled Symantec NetBackup. Which step should be taken next in recovering the master server?

- A. mount the catalog backup media
- B. run the Catalog Recovery Wizard
- C. configure devices
- D. inventory the tape library

Correct Answer: C

---

**QUESTION 15**

An administrator needs to ensure that a restore job is initiated at 3 a.m. tomorrow morning. The administrator will leave the data center tonight at 9 p.m. and will only have access to the system after 6

a.m.

tomorrow morning. What should the administrator do to initiate the job at 3 a.m.?

A.

use the "Go into effect at" setting on the restore job to start the job at 3 a.m.

B.

schedule a task to automatically start a bprestore command at 3 a.m.

C.

initiate and then suspend the restore job, then select "resume at" and select "in 6 hours"

D.

create a restore policy that goes active at 3 a.m.

Correct Answer: B
