Following Questions and Answers are all new published by VMware Official Exam Center

QUESTION 1

A logical design includes basic subsystems that the design will use and data flow directions, but it does not include specific hardware or settings details.

A. True

B. False

Correct Answer: A

QUESTION 2

An upstream relationship is a logical object or component that has dependency on other items in a solution.

A. True

B. False

Correct Answer: A

QUESTION 3

A number of factors determine how many physical adapters are needed in a host design. Which of the following is not one of them?

A. Virtual machine size

B. Amount of bandwidth required

C. Security requirements

D. Hardware fault tolerance

Correct Answer: A

QUESTION 4

Active discovery methods may impact the platform used for monitoring.

A. True

B. False

Correct Answer: A

QUESTION 5

You are planning a vSphere 4.1 to 5.0 upgrade. The production datastores are 6 TB. Each datastore consist of thee extents of 2 TB and is currently 65% full. The operations team would like to keep the system as close to the current configuration as possible. The upgrade process also requires as little service impact as possible. In addition, you wish to use storage I/O control as soon as possible, due to a mission-critical business application requirement. Which of the following would be the correct approach?

A. Create a new VMFS 5 datastore of 6 TB Enable storage I/O control Migrate the VMs using storage vMotion Configure storage I/O shares as required

B. Upgrade the VMFS 3 datastore Enable storage I/O control Configure storage I/O shares as required

Correct Answer: A

QUESTION 6

Which of the following settings could be utilized when performing a performance test on an application server?

A. CPU Limits

B. Share Values

C. Reservations

Correct Answer: C

QUESTION 7

Which of the following will still function if vCenter crashes?

A. HA

B. DRS

C. FT

D. Storage DRS

Correct Answer: A

QUESTION 8

During an upgrade of VMware vSphere 4.1 to vSphere 5.0, several virtual machines appeared to have lost network configuration. What is the possible cause of the issue?

A. DHCP server not available

B. Incorrect order of upgrade implementation steps

C. Incorrect drivers.

Correct Answer: C

QUESTION 9

A platform has an RPO of 4 hours. The platform crashes at 2 p.m. Which of the following is correct?

A. The platform must be ready for users to access by 6 p.m., with data versions from at least from 10 a.m.

B. The platform must be ready for users ASAP, with data versions from at least 10 a.m.

C. The platform must be ready for users to access by 6 p.m., and the data age is unknown from the RTO.

Correct Answer: B

QUESTION 10

When configuring HA, which admission control policy should be used?

A. Host Failure Cluster Tolerates

B. CPU and Memory Percentage for Failover

C. Standby Host

D. None of the above

Correct Answer: B

QUESTION 11

Which of the following type of discovery methods used in state-analysis techniques is more likely to affect application or server performance.

A. Active

B. Passive

C. Both A and B

Correct Answer: A

QUESTION 12

Storage tiering involves _____.

A. priority locations to migrate virtual machines

B. grouping storage to be used first

C. categorizing storage by the size of the LUNs

D. categorizing storage based on performance to meet SLAs

Correct Answer: D

QUESTION 13

A nonfunctional requirement _____.

A. specifies what the system should do

B. is a detail that happens to be true but has not been tested or verified

C. specifies how the system should behave

D. is an attribute that can prevent a project from being completed

Correct Answer: C

QUESTION 14

Which design is created first?

A. Conceptual design

B. Physical design

C. Logical design

D. None of the above

Correct Answer: A

QUESTION 15

VMware Capacity Planner is an example of a(n) _____ discovery tool.

A. active

B. passive

Correct Answer: B
