QUESTION 2

Which statement regarding various product features are true?

A. Veeam Explorer for Sharepoint in Standard Edition only provides limited restore support from Microsoft Hyper-V VMs.

B. It is possible to switch a paid edition to free edition by going to View > Free functionality only from the menu.

C. Backups from Hyper-V will never use storage snapshots - only VM snapshots.

D. Veeam Explorer for Sharepoint in Standard Edition provides full restore support from VMware vSphere VMs.

E. Enterprise Plus edition includes WAN acceleration which can be used for Backup Copy Jobs and Replication Jobs across the WAN.

Correct Answer: D

QUESTION 3

Which of these statements regarding Veeam Backup and Replications Powershell Snap-in are true? (Select two)

A. To see a list of available commands use: Get-VBRCommands

B. The PowerShell Snap-In is an optional component.

C. The PowerShell Snap-In is installed by default.

D. The PowerShell Snap-In is available for all editions.

E. A PowerShell script could be run as a post-job activity.

Correct Answer: AB

QUESTION 4

Which file extension are associated with Veeam Backup and Replication?

A. .vbo

B. .bco

C. .vhb

D. .vbs

E. .vlb

F. .vrb

Correct Answer: B

QUESTION 5

A backup job is configured as follows.

Mode	Forward incremental with weekly synthetic full
Start time	Every day at 20:00
Active full	Sunday
Restore points to keep	14 restore points
Time to finish job	1 hour
Job created	Friday, 13:00

How many full and incremental restore points will be in a repository on day 16 at 23:00?

A. 3 full and 14 incremental

B. 2 full and 12 incremental

C. 3 full and 15 incremental

D. 1 full and 13 incremental

Correct Answer: B

QUESTION 6

Which of the following can help to reduce the amount of traffic that is sent over the network during a second run of a replication job?

A. Replica mapping

B. WAN Acceleration for replicas

C. Re-IP Rules

D. Replica seeding

Correct Answer: D

https://helpcenter.veeam.com/docs/backup/vsphere/replica_seeding.html#:~:text=Replica%20seeding%20and%20map
ping%20are,traffic%20sent%20over%20a%20network.

QUESTION 7

A backup administrator is planning to install Veeam ONE. Which data collection mode collects the most data per VM?

A. For vCenter data only

B. Optimized for advanced scalability deployment

C. For backup data only

D. Optimized for typical deployment

Correct Answer: D

Reference: https://helpcenter.veeam.com/docs/one/deployment/data_collection_modes.html?ver=100

QUESTION 8

The advanced installation scenario requires installing the Veeam ONE Server component (server part) on one machine
and installing the Veeam ONE Web UI component (client part) on another machine.

A. True

B. False

Correct Answer: A

QUESTION 9

Which can be added as Backup Repositories? (select three)

A. Linux Server

B. SMBv3

C. Microsoft Windows Server

D. NFS

E. CIFS

Correct Answer: ACE

QUESTION 10

A. Change the replication Job to reverse the replication

B. Failback + commit failback

C. Undo failover

D. Permanent failover

Correct Answer: D

QUESTION 11

Which of the following should be taken into account when estimating the amount of disk space necessary to store backups? (Choose two.)

A. Type of a disk (thick or thin)

B. Total size of used data for the VMs being backed up

C. Veeam Backup and Replication edition

D. Hypervisor and host version

E. Retention period for backups

F. RAID configuration of the Backup Repository

Correct Answer: BE

QUESTION 12

How are VMware replica restoring points stored at the target host?

A. As virtual machine snapshot(s)

B. As incremental .vib files

C. As incremental .vrb files

D. As full .vbk files

Correct Answer: A

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/replica_settings_vm.html?ver=95

QUESTION 13

Which of the following best describes the Snapshot Hunter feature?

A. Veeam ONE dashboard used to detect orphaned VMware vSphere snapshots that may remain after backup or replication job sessions

B. A part of Veeam Explorer for Storage Snapshots responsible for locating the required snapshot for restore

C. A Veeam technology used to detect and remove orphaned VMware vSphere snapshots that may remain after backup or replication job sessions

D. A Veeam CBT filter driver, used for Instant Recovery in the Microsoft Hyper-V environments

Correct Answer: C

QUESTION 14

Match each of the following entities that Veeam Backup and Replication uses to manage tapes with its definition.

Hot Area:

Answer area

Media pools

Select...
Separate sets of tapes with data continuously written to them
Logical containers for visualizing data stored offline
Logical units that distribute free tapes for writing data and storing information about data that was archived to them
Separate sets of files written to tape within one tape job session

Media sets

Select...
Separate sets of tapes with data continuously written to them
Logical containers for visualizing data stored offline
Logical units that distribute free tapes for writing data and storing information about data that was archived to them
Separate sets of files written to tape within one tape job session

Backup sets

Select...
Separate sets of tapes with data continuously written to them
Logical containers for visualizing data stored offline
Logical units that distribute free tapes for writing data and storing information about data that was archived to them
Separate sets of files written to tape within one tape job session

Media Vaults

Select...
Separate sets of tapes with data continuously written to them
Logical containers for visualizing data stored offline
Logical units that distribute free tapes for writing data and storing information about data that was archived to them
Separate sets of files written to tape within one tape job session

Correct Answer:

Answer area

Media pools	Select...
	Separate sets of tapes with data continuously written to them
	Logical containers for visualizing data stored offline
	Logical units that distribute free tapes for writing data and storing information about data that was archived to them
	Separate sets of files written to tape within one tape job session

Media sets	Select...
	Separate sets of tapes with data continuously written to them
	Logical containers for visualizing data stored offline
	Logical units that distribute free tapes for writing data and storing information about data that was archived to them
	Separate sets of files written to tape within one tape job session

Backup sets	Select...
	Separate sets of tapes with data continuously written to them
	Logical containers for visualizing data stored offline
	Logical units that distribute free tapes for writing data and storing information about data that was archived to them
	Separate sets of files written to tape within one tape job session

Media Vaults	Select...
