QUESTION 1

After a successful replica failover, you decide that you want to switch back to the original VM and permanently transfer the changes that occurred in the replica VM while it was in the Failover State. Which course of action should you choose?

A. Change the initial Replication job to reverse the replication

B. "Undo Failover"

C. "Failback" + "Commit Failback"

D. "Permanent Failover"

Correct Answer: B

QUESTION 2

Which events in Veeam Backup and Replication can be configured for automatic email or general UI notifications? (choose the 4 appropriate options)

A. Low disk space at the repository

B. Veeam support contract expiration

C. Too many snapshots on the VM

D. A new Veeam Backup and Replication patch

E. Necessary updates for the Microsoft Hyper-V hosts and off-host backup proxies

F. Necessary updates for the VMware vSphere hosts and backup proxies

Correct Answer: ABEF

QUESTION 3

A scale-out backup repository is configured with data locality policy. How is an extent selected during an active full backup? (Choose two.)

A. Always the same extent as the previous full backup

B. An extent determined based on load control settings and free space

C. A different extent from the previous chain to avoid single point of failure, if possible on free space

D. It tries the same location as the previous full if using a deduplication appliance

Correct Answer: AB

QUESTION 4

If the compression level and deduplication settings are changed in an existing job, previously created backup files will:

A. Be deleted after creating a new active full backup

B. Change according to the new settings

C. Decompress and compress again with the new compression level

D. Remain the same

Correct Answer: D

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/compression_deduplication.html?ver=95u4

QUESTION 5

Which of these statements regarding Instant VM Recovery are true?

A. Instant VM Recovery only works from newest restore point.

B. Migration to production after Instant VM Recovery allows to change disk type.

C. Instant VM Recovery is only available in paid editions.

D. Instant VM Recovery allows a VM to be fully booted and all applications up and running in as little as 2 minutes

E. After migration to production has completed the Instant VM Recovery, VM is automatically no longer published.

Correct Answer: D

QUESTION 6

With which version(s) Is it possible to perform backup recovery verification?

A. Standard

B. All editions

C. Enterprise Plus

D. Enterprise and Enterprise Plus

E. Free

Correct Answer: B

QUESTION 7

Which statement regarding various product features is true?

A. Enterprise and Enterprise Plus allows multiple On-Demand Sandboxes to run simultaneously using the same virtual lab.

B. Veeam Backup and Replication utilises vStorage APIs for Data Protection (VADP) when backing up VMs from Microsoft Hyper-V and VMware vSphere.

C. Enterprise Plus edition includes Premium Support SLA.

D. Quick Migration is currently available for VMware vSphere only.

E. VM copy is supported by Microsoft Hyper-V and VMware vSphere in all editions.

Correct Answer: B

QUESTION 8

A Backup Administrator has to achieve minimal RPO. Which of the following setups is most appropriate?

A. Backup jobs are performed on a regular basis

B. Backup jobs run continuously

C. Each backup job serves as a source for an appropriate replication job

D. Backup jobs can be started manually at any time

Correct Answer: B

Continuous replication is more reasonable if you want to get minimal RPO (in this case each subsequent job run will start on completion of the previous job run, so the RPO will be equal to the time required to complete a job).

QUESTION 9

Which statements regarding various product features are true? (select three)

A. 1-Click-Restore is used in Backup Browser and Veeam Explorers to allow restore to original location.

B. 1-Click-Restore is used in Enterprise Manager

C. Standard Edition allows browsing and searching for files in both current and archived backups (moved to tape)

D. All editions (incl. free edition) offers tape functionality

E. You can clone existing jobs and edit their settings from Enterprise Manager web UI

Correct Answer: ABC

QUESTION 10

Which actions can be used to locate the exact extent of a Scale-Out Backup Repository containing a particular virtual machine\\'s backup data? (Choose two.)

A. Check Job session data

B. Check backup Proxy settings

C. Check Scale-Out Backup Repository settings

D. Open the extent repositories manually

Correct Answer: AC

QUESTION 11

Does the Planned Failover feature shut down the production VM?

A. No, the production VM will keep running.

B. A pop-up window prompts the user to choose whether the production VM should shut down

C. No, but the production VM is temporarily suspended.

D. Yes.

Correct Answer: D

QUESTION 12

Veeam Backup and Replication supports Dell EMC Data Domain storage systems working over the following protocols. (choose the 2 appropriate options)

A. FC

B. TCP/IP

C. FTP

D. FCoTR

Correct Answer: AB

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/emc_dd.html?ver=95

QUESTION 13

A Backup Administrator has setup a Backup Job, utilizing Reverse Incremental backup mode. After the first successful

backup, an on-Demand Sandbox is deployed and started. How will the On-Demand Sandbox be affected if the Backup Job is started?

A. The On-Demand Sandbox will not be affected and the Backup Job will start as scheduled

B. Veeam Backup and Replication automatically powers off virtual machines in the On- Demand Sandbox/Virtual Lab and stops the SureBackup Job immediately

C. The SureBackup job will fail immediately

D. The backup job will fail immediately

Correct Answer: D

QUESTION 14

When is the mount server component used?

A. When there are multiple backup servers

B. When the remote backup repository is a CIFS share

C. When restoring files or application items with Veeam Explorers

D. When backing up to tape at a remote site

Correct Answer: C

QUESTION 15

Which of the following Veeam Backup and Replication jobs can be set up to support GFS retention? (Choose two.)

A. Backup Copy

B. Backup

C. Backup to tape

D. Replication

E. Configuration Backup

Correct Answer: AB
