-  **800,000+** Satisfied Customers

QUESTION 1

Extreme compression produces the smallest backup file, but it may also reduce:

- A. Backup performance
- B. Time needed to perform a backup
- C. Blocks of free space
- D. Identical blocks of data

Correct Answer: A

Extreme compression provides the smallest size of the backup file but reduces the backup performance. References:

QUESTION 2

A Backup Administrator needs to create an offsite backup job. A Windows-based server is used as a repository. Which placement of the Veeam Data Mover Service(s) would result in the most optimal configuration?

- A. One - at the remote target site
- B. One - at the production site
- C. At least two - one at the production site and one at the remote site
- D. Veeam Data Mover services are not required to transfer data offsite

Correct Answer: C

QUESTION 3

Which of these statements regarding Veeam Backup and Replications PowerShell Snap-in are true? (Select two)

- A. To see a list of available commands use: Get-VBRCommands
- B. The PowerShell Snap-In is an optional component.
- C. The PowerShell Snap-In is installed by default.
- D. The PowerShell Snap-In is available for all editions.
- E. A PowerShell script could be run as a post-job activity.

Correct Answer: AB

QUESTION 4

Veeam Explorer for Oracle offers which of the following capabilities? (Choose three.)

- A. Browsing Oracle system hierarchy
- B. Sending Oracle tables as attachments via email
- C. Restoring an Oracle database to the state before the selected transaction
- D. Restoring Oracle databases to the original server or different server

Correct Answer: ACD

QUESTION 5

Which events in Veeam Backup and Replication can be configured for automatic email or general UI notifications? (choose the 4 appropriate options)

- A. Low disk space at the repository
- B. Veeam support contract expiration
- C. Too many snapshots on the VM
- D. A new Veeam Backup and Replication patch
- E. Necessary updates for the Microsoft Hyper-V hosts and off-host backup proxies
- F. Necessary updates for the VMware vSphere hosts and backup proxies

Correct Answer: ABEF

QUESTION 6

Which of the following jobs CANNOT utilize parallel processing?

- A. Backup Copy job
- B. Replication job
- C. Backup job
- D. All of the above can utilize parallel processing

Correct Answer: D

QUESTION 7

Match each Cloud Connect concept with its definitions.

Hot Area:

Answer area

Lease:

▼
Select ...
The amount of space (specified in GB or TB) assigned to one tenant on one cloud repository
A period of time for which the tenants have access to their chunk of storage resources on the cloud repository
The state of a license after the total number of active VMs exceeds the total number of VMs in the license
A network appliance that resides on the SP side and acts as a communication point in the cloud
A combination of CPU, memory, storage and network resources SP assigns to a tenant to enable failover option

QUESTION 12

Which of the following should be taken into account when estimating the amount of disk space necessary to store backups? (Choose two.)

- A. Type of a disk (thick or thin)
- B. Total size of used data for the VMs being backed up
- C. Veeam Backup and Replication edition
- D. Hypervisor and host version
- E. Retention period for backups

Correct Answer: BE

QUESTION 13

Which of the following statements about Oracle Transaction Log Backup are true? (Choose the 3 appropriate options)

- A. The database must have ARCHIVELOG mode enabled to support restore to selected point in time
- B. The database must have ARCHIVELOG mode disabled to support restore to selected point in time
- C. Automatic Storage Management (ASM) is supported for Oracle 11g and later
- D. Oracle Express Databases are supported if running on Microsoft Windows machines only
- E. Automatic Storage Management (ASM) is supported for Oracle 12c and later
- F. Oracle Express Database are supported both on Linux and Microsoft Windows servers

Correct Answer: CDE

QUESTION 14

What is the stabilization point in a SureBackup job?

- A. When all recovery verification tests can be started
- B. When backup file is successfully verified
- C. When the virtual machine starts booting
- D. When all recovery verification tests are passed

Correct Answer: A

QUESTION 15

Since the last remote replica from backup job, the source backup job ran three times, making 3 new restore points. Now the replica from backup job is run again. How many restore points will this replica from backup job create?

- A. None
- B. One
- C. Three
- D. Four
- E. this is not a supported configuration

Correct Answer: B

2018-02-01T09:49:00.01

2018-02-01T09:49:00.02

2018-02-01T09:49:00.09

2018-02-01T09:49:00.09

2018-02-01T09:49:00.09

Although replica from backup might resemble replica seeding, there is difference between these options:
